

Chairman's statement

The 1998 financial year proved to be a very important chapter in the BT story, even if not quite in the way we anticipated 12 months ago.

This time last year, we expected that there was a good chance that our prospective merger with MCI Communications Corporation would be completed by the end of the calendar year. In the event, of course, this did not happen. WorldCom tabled a considerably higher bid for MCI and we did not feel that it would be in shareholders' best interests to match it.

In our view, the preferable course was to accept the offer WorldCom made for our 20 per cent holding in MCI. On completion of the MCI/WorldCom merger, BT will receive around US\$7 billion (more than £4 billion). This, added to the break-up fee and expenses, represents over US\$54 per share for a holding we acquired for just over US\$32 per share in 1994. As I write, the MCI/WorldCom merger is awaiting regulatory clearance in the USA and Europe.

Nor has the success of Concert Communications Services, our joint venture with MCI, been compromised. Indeed, Concert has continued to lead the world in providing global managed network services to multinational customers. MCI WorldCom will, for a period, have non-exclusive rights to distribute Concert products in the USA. Beyond that, we shall ensure that enduring distribution arrangements are put in place for the longer term.

In other important respects, this has been a good year for your company – both in the UK and in other markets around the world.

Turnover has grown by 4.7 per cent and we have seen strong growth in demand. Customers have benefited from sound quality of service, price cuts worth over £750 million in the year, and a range of new and exciting services. Our Internet-related business is growing fast and we are seeing considerable demand for second lines and ISDN connections. We have also announced a major upgrade to our broadband network to match the ever-increasing volumes of data we are required to carry.

Earnings per share were 26.7 pence and I am pleased to report a final dividend for the year of 11.45 pence per share, which brings the total dividend for the year to 19 pence per share, which is as forecast. This represents an increase of 6.4 per cent on last year, adjusted to take account of the special dividend that we paid in September 1997.

Relations with the new Government have been good. Notwithstanding the so-called "Windfall Tax", which we did not and do not believe was appropriate to BT, the Government's interest in the social and economic benefits that information technology can bring is clear and undiminished. We are proud to support the Government's New Deal welfare-to-work initiative, and have been a key player in developing the "national grid for learning" in the UK.

Outside the UK, liberalisation has been gathering momentum. The World Trade Organisation is committed to opening telecommunications markets; and, in Europe, give or take the odd derogation, there has been full competition in the market since 1 January 1998. BT has now established a presence throughout the European Union, and we are engaged in turning long-awaited opportunities into action, across the world.

Our capacity to address such opportunities and to meet the challenges of change depends to a great extent on the skills and commitment of our employees and I thank all BT people for the continued dedication which they have shown to the company over the year.

In a word, we have the right people, the right strategy and the right positioning for success. And we aim to continue to translate that strategy into long-term shareholder value.

I also wish to pay tribute to those directors who retired from the Board during the year, Birgit Breuel, Yve Newbold, Bert Roberts Jnr, Dr Alan Rudge and Gerald Taylor, each of whom made a much appreciated and distinctive contribution to the company's progress during their term of office.

We are pleased to welcome our new non-executive directors, Helen Alexander and Neville Isdell, to our Board. We also welcome Sir John Weston, who will join the Board in the autumn.

In a break with tradition, I would like to close this Chairman's statement on a personal note. I announced earlier this year that, with effect from 31 July, I will become part-time Chairman, having been fortunate enough to serve as your company's full-time, executive Chairman for over ten years.

BT now has a strong and experienced senior management team in place, under the leadership of Chief Executive, Sir Peter Bonfield. There is no longer a need for two full-time executives at the helm.

That said, I shall continue to play a full part in the life of the company and I can assure you that my personal commitment to BT and to the industry is undiminished.

Financial highlights

FOR THE YEAR ENDED 31 MARCH 1998

	1998	1997	1996
Turnover	£15,640m	£14,935m	£14,446m
MCI break-up fee net of expenses	£238m	–	–
Operating profit	£3,657m	£3,245m	£3,100m

– special	–	35.00p	–
Net cash flow from operating activities	£6,076m	£6,192m	£5,834m
Capital expenditure	£3,030m	£2,719m	£2,771m

Iain Vallance

Sir Iain Vallance

Chairman

26 MAY 1998

An interview with Chief Executive, Sir Peter Bonfield

A lot has been said about BT's strategy over the past year. How would you describe it?

Quite simply, our strategy is to seize the opportunities for growth in the communications market worldwide.

In practice, that means continuing to stimulate and meet growing demand in the UK; moving into new growth markets such as the rest of Europe; and maintaining our world-leading position in serving the needs of multinational companies through Concert Communications Services. Across all of those markets, we will also look to take advantage of the explosive growth in advanced services such as mobility, data, multimedia and the Internet.

Communications technologies are the engines of change and growth in the world's economy at the moment – and that gives us a wealth of opportunities. Our task is to seize those opportunities, deliver excellent value for shareholders and, in doing so, realise our vision of becoming the most successful worldwide telecommunications group.

There's a lot of competition for these opportunities. How can BT make sure it makes the most of them?

BT is uniquely well-positioned. We have proved that we can please a wide range of customers. We are highly experienced in competitive situations. We have significant financial strength and we are already an established global player, with operations in all major markets around the world.

Can there be any growth left in the UK market after over a decade of competition?

Yes there is – even though in the last five years we've steadily increased revenues and call volumes. Usage of residential lines continues to increase. It now stands at more than 11 minutes per line per day, a rise of more than two minutes since 1994. Remember also that UK usage is still only 60 per cent of that in the USA – which shows that there is still considerable room for growth. We're now stimulating the market for phone calls with marketing campaigns and, at the same time, developing a whole new market in advanced services.

What are you doing to take the opportunities for growth in mobility, data and multimedia?

We've taken several steps this year to make sure that mobility is a top priority for the company, and that

means all services which help people communicate free from location restraints – including services such as calling cards and messaging as well as mobile telephones. Cellnet – in which we have a 60 per cent stake – has a reputation for innovation. It was the first operator to enable customers to send and receive faxes and data using mobile phones. And, in the last year, it has launched an Internet-linked service, Cellnet Genie, that delivers information such as news, share prices, football scores or job opportunities to your mobile phone. In mainland Europe, we are pioneering the merging of mobile and fixed line services, with one network, one bill and, ultimately, one handset.

The market for data communications is experiencing explosive growth and is set to overtake voice traffic in the next five years. This trend, known as the "datawave", is being driven by developments such as the spectacular growth of the Internet. Already, BT's Internet business is growing faster than 100 per cent per annum. In the UK, we've announced that we will be making a £1.1 billion investment in our networks to meet the demand for data communications and Internet services. In Europe, data revenues are growing very strongly, and Concert offers global companies a choice of data services delivered consistently and reliably around the world.

In the UK, we are also helping the next generation to use data networks by connecting schools to the Net at affordable prices. We're also on the brink of a multimedia innovation that will transform the domestic communications market: digital interactive television. Subject to the necessary regulatory clearances, our joint venture, British Interactive Broadcasting, will enable people to do some shopping, check their bank statement, have an on-line tutorial or buy a CD, all from their homes. They will be able to receive and respond to information via the TV set using a combination of satellite transmission and the telecommunications network.

How can BT give sufficient attention to both UK and global activities?

We have structured the company to ensure that we can pursue these various opportunities with clarity and determination. I have established a small team to drive group strategy and take an overview of BT's operations in the UK and internationally. BT UK, under Bill Cockburn, is focused on the domestic UK market,

with the objectives of achieving sustained growth from the core telephony business and maximising value in growth markets. Meanwhile, BT Global, under Alfred Mockett, is concentrating on investing in, and developing, new markets around the world. The team which handles mobility and multimedia opportunities reports directly into me and provides a strategic focus on two of the major worldwide opportunities.

Europe is providing many growth opportunities at the moment – how would you describe BT’s operations there?

“Fast-moving” is the best description. Europe is a huge opportunity – a market which has been open to competition since 1 January 1998. We have joint ventures operating in every major country and they have already won 11 licences for fixed or mobile services. Taken together, our European alliances are expected to have annual revenues of £2.5 billion this year, a rise of around 50 per cent. They expect to recruit 4,000 people in 1998. Our partners are companies with local influence and established infrastructures. They include financial services providers, media conglomerates, transport companies and retailers, and they all supplement BT’s technology skills and competitive experience with a deep understanding of their own national markets.

Beyond the UK and Europe, what have been the other highlights of the year?

First, it’s been another good year for Concert Communications Services, the joint venture we have operated with MCI since 1994. Concert leads the market for global services used by the top multinationals. It is growing at almost 50 per cent per year, serves 40 per cent of the Fortune 500 top companies and was rated number one global outsourcer in the Yankee Group’s survey of customers. Other highlights were winning fixed and mobile licences in Singapore – along with partners, including NTT of Japan; signing a Memorandum of Understanding to co-operate with China Telecom; and announcing that we would be the first European communications company to contribute to a working group including top IT names like Compaq and Microsoft to look at setting standards for new high-speed services.

How do you assess the impact of not merging with MCI?

I still believe that merging on the terms which we negotiated would have been a good result for BT and its shareholders, but we decided not to go ahead at a price which would have been uneconomic for BT. Had we chosen to match the rival bid, we believe it would have been against shareholders’ interests. As it was, we took action to secure a good return, maintained our services to US customers through Concert Communications Services and kept open our options to pursue new growth opportunities.

So what now in the USA?

We now have two objectives. The first is to make sure we have the most comprehensive possible sales, service and support for customers of Concert Communications Services in the USA. Second – and this is a separate issue – there may still be investment opportunities in growth areas of the US domestic market. It is a valuable market, with over one-third of the world’s telecoms revenues. We are looking at all the options but we will only take an opportunity if it will deliver real value for shareholders.

In overall terms, what’s your vision for BT?

To be a company that delights customers and shareholders, and is a good place to work. To seize growth opportunities around the world. To help people use communications technology to improve their education, their health, their business. To enable people to use communications to expand their horizons and to get more out of their lives, as employees, as consumers and as citizens.

Sir Peter Bonfield CBE

Chief Executive

26 MAY 1998

Business review

BT is one of the world's leading suppliers of fixed and mobile communications services. In the UK, we support around 27 million customer lines and, through our 60 per cent stake in Cellnet, over three million mobile connections. Our main services are local, national and international calls (with direct dialling to over 230 countries worldwide); and supplying telephone lines, equipment and private circuits for homes and businesses.

Outside the UK, our strategy is to expand in chosen markets by developing a series of alliances and joint venture partnerships, and we have put in place one of the most comprehensive global networks of any operator. In Concert Communications Services, we have the world's leading supplier of global network solutions to multinational customers.

We are also at the forefront of the development and marketing of a comprehensive range of advanced data and interactive multimedia solutions and technologies of the future.

As businesses increasingly operate internationally, and as more and more people are travelling and working abroad, so the demand for international communications grows. In the past ten years, international communications – phone, fax, video, data – have more than doubled from 33 billion minutes a year to 68 billion minutes.

This growth in demand has been complemented by the liberalisation of telecommunications markets around the world. At the beginning of the 1990s, only about 20 per cent of the world's total telecommunications market was open to competition; by the end of the decade, only about ten per cent will *not* be.

We currently have three target geographies – North America, Europe and Asia-Pacific – and our strategy is to work with local partners. We now have a number of key partnerships around the world and significant investment in international services.

The USA

In the USA, the principal news in the year was the announcement by MCI Communications Corporation on 10 November 1997 that it was recommending a merger with WorldCom to form MCI WorldCom and that WorldCom would be buying BT's stake in MCI. The WorldCom bid for MCI was considerably higher than

that made by BT and the BT Board did not feel it would be in shareholders' interests to raise its offer.

WorldCom has agreed to pay BT around US\$7 billion (more than £4 billion) for our share in MCI. This, added to the US\$465 million break-up fee and partial reimbursement of expenses, represents over US\$54 per share for a holding that was acquired for US\$32 per share in 1994. At the date of this report, the proposed MCI/WorldCom merger was awaiting the necessary regulatory clearances.

BT is now assessing the options open to the group. We remain committed to securing appropriate distribution channels for the delivery of services to our US customers.

Concert

Through the highly successful Concert Communications Services, BT will continue to deliver global networking solutions to our multinational customers, more than 40 per cent of whom are headquartered in the USA. Concert already has 3,800 major corporate customers in more than 50 countries.

Around 40 per cent of the Fortune Global 500 companies use Concert services, and around 60 per cent of Concert's customers subscribe to more than one service.

Concert has committed future revenues of almost US\$1 billion per annum and has been rated the best-positioned global networking outsourcer and top global provider of international voice services in a survey by the Yankee Group, a leading telecommunications consulting firm.

MCI WorldCom will continue to distribute Concert services in the USA, on a non-exclusive basis, for a limited period of time.

Europe

In mainland Europe, it is a time of great opportunity for BT. By 1 January 1998, the major European Union countries had to open their telecoms markets to full competition. Some of Europe's business and mobile markets have been open for some time but now, with just a few exceptions, there is open competition for the business of 300 million residential customers across the continent, in a market that will be worth an estimated £140 billion a year by 2001.

BT's major European alliances

• <i>France</i>	Cegetel	
• <i>Germany</i>	Viag Interkom	
• <i>Italy</i>	Albacom	
• <i>Netherlands</i>	Telfort	
• <i>Spain</i>	Airtel	
• <i>Sweden</i>	Telenordia	
• <i>Switzerland</i>	Sunrise	

Because we believe that in international business it is essential to think global but act local, we have already moved fast in many countries to establish ourselves, with our partners, as the major alternative to the incumbent operators.

We have built partnerships or established distributorships in each of the markets that are opening up. Typically, our partners have not been other telecoms operators but local companies with strong reputations and experience which complements our own. In Germany, our main partner is Viag, a major energy and industrial group with whom we have formed Viag Interkom; in France, we have teamed up with a group headed by Vivendi to form Cegetel. In Italy, we have partnered with energy group ENI, media organisation Mediaset, and Banca Nazionale del Lavoro to form Albacom; and in the Netherlands we have formed Telfort in partnership with the state railway company Nederlandse Spoorwegen.

In total, our ventures cover 85 per cent of the EU market. We have already invested almost £2 billion in European ventures and expect to make further substantial investments over the next few years.

In Germany, France, Italy, the Netherlands, Switzerland, Ireland and Sweden we, alone or in partnership, already have licences to run fixed line services, and we will benefit from mobile network licences in Germany, France, the Netherlands, and Spain too. In other countries, bidding for licences is still in progress.

In February 1998, it was announced that Telfort had won one of two new national Dutch mobile licences, to go with the fixed line licence it already holds. Initial coverage, which will start at the end of this year, will be confined to metropolitan areas, but we aim for 99 per cent national geographic coverage by the end of 1999.

BT's new joint venture in Switzerland, Newtelco, won no fewer than 25,000 customers in the first month when its Sunrise service opened for business in January 1998. Jointly owned by BT, TeleDanmark, Swiss railways, Union Bank of Switzerland and the retail giant Migros, Sunrise means that, for the first time, Swiss customers have a choice of telecoms supplier for some of the calls they make outside Switzerland.

In September 1997, we completed our deal to take a 26 per cent stake in Cegetel, the new French telecommunications group which, in 1997, had revenues of over £1 billion. Cegetel will provide the full range of telecommunications services – both fixed and mobile – and is already positioned to be the main competitor to France Telecom. Cegetel's fixed network service was launched at the beginning of February 1998 and, in the first two months, attracted around 140,000 customers. It also holds a majority stake in SFR, the number two mobile operator in France, with more than 2.5 million customers and a market share of approximately 40 per cent of new subscribers.

In Spain, our fixed line operator – BT Telecomunicaciones – has the second largest data network and has trebled its revenues since it was set up in 1994. And Airtel, in which BT has a 16 per cent stake, has more than a million mobile customers and 40 per cent of the Spanish digital market.

In December 1997, BT and the Electricity Supply Board in the Republic of Ireland announced that they had reached agreement in principle to form a joint venture to offer communications services in Ireland, one of western Europe's fastest growing economies.

Asia-Pacific

The Asia-Pacific telecommunications market is one of the fastest growing in the world, and BT already has offices or ventures in Japan, China, Taiwan, South Korea, Malaysia, Singapore, Indonesia, Thailand, the Philippines, Australia, New Zealand and India.

In April 1997, BT•NIS (a joint venture between BT and Marubeni) began trading in Japan as a Concert distributor, Internet service provider and supplier of advanced voice and data services. In February 1998, BT•NIS announced its intention to apply for a licence to take advantage of the newly-liberalised telecoms market in Japan.

China is one of the most exciting markets in the region and, potentially, one of the largest in the world. For the last few years that market has grown at a rate of about 20 million lines a year.

In March 1998, BT took a further step into this market by signing a Memorandum of Understanding (MoU) with the state-owned operator, China Telecom. Although the MoU does not involve investment, it will foster co-operation and understanding between the two companies, and enable us to swap technology and examine mutually beneficial business opportunities.

And, in Singapore, BT is part of a consortium which has recently won a fixed and a mobile licence, enabling it to compete with Singapore Telecom from April 2000.

In the UK

BT's UK network is one of the most advanced in the world, and we have invested nearly £30 billion since we were privatised in 1984. Investment at this level ensures that we can continue to deliver reliable and innovative services to all our customers.

There are more than 3.5 million kilometres of optical fibre in the UK network, 7,500 local exchanges and 69 main switching units.

Business communications

One of the key growth areas for BT has been the increase in business lines, mainly due to new ISDN lines. These are now also being used in the home for Internet access.

Among our larger business customers, there is a growing realisation that they can gain significant competitive advantage by using a single supplier to provide them with integrated communications solutions. BT's Syncordia Solutions is at the forefront of this rapidly growing outsourcing market.

And, as the value of transactions in the world's capital markets is expected to continue to increase rapidly, BT – through its systems integration business Syntegra – has become the global market leader in the design and provision of dealing rooms and trading systems. Syntegra has a global market share of 25 per cent of dealing boards and our systems are used by 45,000 financial traders around the world.

Currently, only a third of small and medium-sized businesses use electronic mail, compared with two-thirds of large firms; and only a quarter use the Internet, compared with around half of large corporations. But the market for information technology and communications in this sector is expected to grow by around 50 per cent in the next five years and we believe that this is a market of huge importance to BT.

BT and the Confederation of British Industry are jointly sponsoring the Information Society Forum, which focuses in particular on the impact of new technology on the small business market. We are also working closely with the British Chambers of Commerce, offering Internet access to all their members. And, in South Wales, BT and the European Commission are financing the work of the world's first chair of electronic commerce at Cardiff University. The University has become the hub of the South Wales "virtual business community", in which a number of small businesses are discovering how technologies such as the Internet and videoconferencing can help them find new ways to market themselves, cut down on travel costs, get closer to their customers and suppliers, and trade internationally.

We have also teamed up with Comet, a leading UK retailer of consumer electronic equipment, to test a new concept in retailing. Called *I.T. Works*, this is a store dedicated to the information technology and communications needs of smaller businesses. Personal computers, software and peripherals are on sale along with the latest in communications technology. If the trial proves successful, *I.T. Works* stores will be opened across the UK.

Quality of service

BT places great emphasis on quality of service and our customers' satisfaction with the service we provide. We conduct over 22,000 interviews every month with our residential customers and with the general public, as well as over 10,000 interviews with our business customers.

For the period October 1997 to March 1998, 83 per cent of our residential customers and 88 per cent of our business customers said they were satisfied with the services we provide. Satisfaction with inland calls was 95 per cent.

Some residential customers were badly hit by the weather problems in late December and early January – the number of faults cleared in nine working hours or by successful appointment dropped to just under 80 per cent. However, for our business customers, the number of faults cleared in five working hours or by successful appointment increased to over 89 per cent.

Ninety two per cent of customers are satisfied with our Operator Assistance Service (100) and 90 per cent are satisfied with our Directory Assistance Service (192).

BT is investing £84 million in new technology to improve the standards of its directory enquiries service, including an expansion of the database so that, by 2000, it will also be able to provide the numbers for mobile phones, radiopagers and fax machines.

Network reliability remains consistently high – less than one call in 200 fails because of the network, and a customer is unlikely to experience a network fault more than once every seven years on any one of his or her lines.

The number of BT payphones in the UK has grown to just over 138,000.

Regulation

Since August 1997, BT has operated under a price cap formula – agreed with Oftel – of the Retail Price Index (RPI) minus 4.5, covering the services used by those residential customers whose bill size was in the lowest 80 per cent. Under the formula, the price cap applies to less than 20 per cent of BT's total revenues, in contrast to the previous formula of RPI minus 7.5 which ran for the four years until the end of July 1997 and applied to about 50 per cent of revenues.

In March 1998, Oftel instigated a Monopolies and Mergers Commission (MMC) reference on the issue of the pricing of calls made to mobile phones. The enquiry is still underway and will report to Oftel in early September. BT believes that the prices of its services reflect the competitive nature of the UK market and are fully justified. However, we acknowledge the objective approach that an MMC referral will bring and we are

co-operating fully with the MMC's investigation.

We are making constructive progress in obtaining regulatory approval for the British Interactive Broadcasting venture, which we are seeking to launch in conjunction with BSkyB, Matsushita and Midland Bank. Scheduled to be launched later in 1998, it will provide a range of services, including home shopping, home banking, home education and information services, as well as Internet, e-mail access and computer games, through a television set-top box.

Internet

The Internet is a key market for BT – our Internet business is currently growing faster than 100 per cent per annum and BT Internet is one of the largest UK Internet service providers.

In March 1998, United News & Media joined BT and News International as an equal partner in LineOne, the Internet-based information and entertainment service for residential customers. LineOne brings customers news, sport, entertainment, business information and home shopping and is the only UK-focused on-line service of its kind.

For businesses, BT WebWorld is a quick, easy and cost-effective web hosting service for creating and operating Internet sites. BT WebWorld offers a full range of web hosting functions, together with web site design packages. Customer support is available seven days a week by e-mail, fax or telephone. Features include high availability systems, regular back-ups and high capacity connections to the Internet.

In addition to the Internet, private corporate intranets have emerged as a source of new business. For example, BT Intranet Complete is a "ready-to-go" solution for companies keen to get started on their own intranet. And BT Intranet Builder offers a "one-stop-shop" for companies wishing to develop their own intranets, providing a comprehensive range of the best components and support services.

Multimedia

In the last 12 months, BT has stepped up its research into, and trials of, interactive multimedia services. Multimedia embraces the Internet, interactive television, and video and audio material delivered over networks to the home or office.

Multimedia is already growing fast, with 10 million e-mails sent each day in the UK and 30 new web pages set up on the Internet every minute. Around five per cent of local call traffic carried by BT is now Internet-related.

Multimedia's popularity is set to increase rapidly. BT trials show that 60 per cent of people would prefer their television service to feature interactivity and the ability to call up videos on demand.

The network

Multimedia's uptake will depend on the capacity of networks to deliver its material and to provide return channels through which consumers can respond to what is broadcast or distributed. BT is therefore working to provide the best possible networks, while keeping costs within affordable limits.

During the year, we announced that we would spend an additional £300 million on upgrading our network to enable it to carry more data at faster speeds. Such an upgrade will help the network support new services such as Home Highway. Home Highway is a new digital communications service that will transform a customer's existing home telephone line into a high-speed Internet and multimedia connection.

Much of our current network investment is focused on the ways that technology can make our existing network investment carry all the latest services by – for example – delivering video services over the existing copper network. This will enable us to provide new services at the most affordable price.

BT is carrying out trials of ADSL (asymmetric digital subscriber loop) technology, which uses compression techniques to increase the capacity of a phone line 30-fold, giving high-speed Internet access, TV-quality video and CD-quality audio.

Variants on this theme are also in development, including the highly economical DSL Lite and the more expensive VDSL (very high-speed digital subscriber loop).

In March 1998, it was announced that BT will be working with Microsoft subsidiary WebTV Networks in a trial of the WebTV service, for which BT will be the Internet service provider.

Mobility solutions

BT is also enhancing and sharpening its focus on the mobile telecommunications market, expanding the way

it has traditionally thought of customers' mobility requirements.

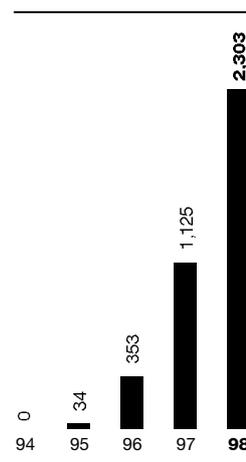

Analysts predict that, within five years, the mobile communications market will account for 30 per cent of all telecommunications revenues, with some 12 to 14 million people in the UK having a mobile phone, compared with nine million today.

Cellnet

BT has a 60 per cent stake in Cellnet, the mobile telecommunications network operator, and – through BT Mobile – offers customers a range of integrated and innovative mobility solutions, enabling them to stay in touch wherever they are.

Cellnet has more than three million customers, the vast majority of whom are connected to the digital GSM network.

Number of Cellnet's digital connections (thousands)

Cellnet was the first UK network to offer a full, two-way digital fax and data service. In effect, a fax number is assigned to an individual rather than a machine. Mobile phone users can now receive and send data securely while on the move in many of the countries with which Cellnet has "roaming" agreements.

September 1997 saw the launch of Cellnet Genie, a world first and one of the UK's most comprehensive free information sources on the Internet. The Genie website brings together the very latest information on news and current affairs, sport, finance, entertainment, travel and careers on one web site. Customers accessing the site can ask for information to be delivered to their mobile phone via text messages or to an e-mail address.

Cellnet plans to launch a radio-on-demand service, allowing people to access personalised news and sports voice reports – beginning with football – at the touch of a button on a Cellnet digital phone.

Card Services

BT's Card Services have developed and launched Concert Card, BT's first truly international calling card for the global marketplace. Launched initially in three European markets in association with our joint venture partners in Italy and Germany, Concert Card combines local tailoring with BT's global capacity to offer a seamless service to international customers outside of the UK. It is positioned specifically to appeal to business travellers from abroad who have a need to call internationally.

Pricing

Since December 1993, BT has cut call prices by more than £2 billion.

At the same time, we have introduced a wide range of flexible optional discount schemes tailored to suit the needs of all our business and residential customers.

BT has a minimum call charge of 5p at basic rates – 3.8p with PremierLine and Friends & Family discounts.

The biggest reduction in the year came in May 1997 when BT cut the price of national daytime calls by ten per cent. At the same time, regional daytime calls were cut by 3.8 per cent.

In September 1997, the pricing structure of BT payphones was simplified. The 10p minimum fee remains unchanged and customers now receive up to 50 per cent more time for their money on UK long-distance daytime calls.

And the cost of calling has continued falling since the year end. On 29 April 1998, the cost of local calls made in the evening and overnight, Monday to Friday, came down by more than ten per cent – from 1.7p a minute to 1.5p.

In December 1997, BT welcomed a High Court decision to lift a temporary injunction preventing us from circulating a report which compared our prices favourably with those of Cable & Wireless Communications.

BT recognises that customers need to compare what each supplier has to offer and assess which is best for them. But, to make a realistic comparison between BT and other suppliers, customers need to be able to compare like with like. In competitors' advertising activity, it is often their best call discounts that are compared with BT's base call rates and no account is taken of our discount packages.

Marketing

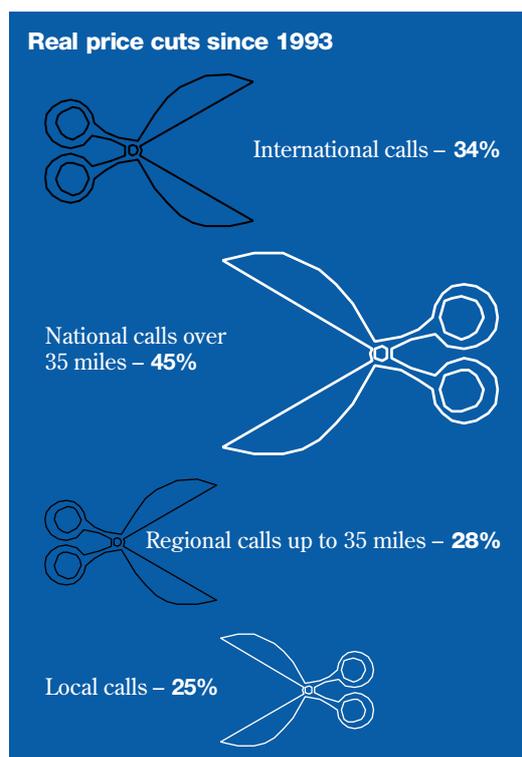

Marketing campaigns have played a key role in relaying the message that BT is committed to cutting prices and to changing the way people in the UK regard the telephone.

Thanks to campaigns such as *It's good to talk* and discount packages such as Friends & Family, average residential telephone usage has increased by more than two minutes per day since 1994, to a level which is still only around 60 per cent of that in the USA. Usage per line per day has increased by more than 42 seconds in the past 12 months.

Last year saw the launch of several new marketing campaigns aimed at increasing the number of residential customers connected to BT.

Our Acquisition campaign, involving a mailing to all UK households not benefiting from a telephone service, has resulted in over 45,000 new customers choosing to connect to BT.

Our Reconnection campaign has been even more successful, attracting a further 100,000 customers who

had previously given up BT service to reconnect for just £9.99. This campaign includes mailings, telemarketing, a new field marketing operation and television advertising.

Finally, nearly 300,000 BT customers opted for a second line during the year, encouraged by marketing special offers promoting half-price installation and other incentives.

Regional dimension

The regional dimension of UK business is becoming increasingly important and BT is working in close partnership with customers in all regions to aid social and economic development.

Examples include some of the more remote parts of the Scottish Highlands and Islands. Since distance is no obstacle, and location is no longer a constraint, the vast majority of 999 calls on the UK mobile network are handled in Inverness, bringing much needed local employment.

And, in Thurso, BT has recently opened a state-of-the-art call centre which is helping us to build those all-important relationships with our customers, and enabling us to treat them in a more responsive and customer-friendly manner.

In February 1998, the Secretary of State for Northern Ireland opened BT's new £9 million call centre in south west Belfast, a project on which we worked with the Northern Ireland Industrial Development Board.

And, in April 1998, BT announced the creation of 800 new jobs over the next 12 months in a new £6 million call centre in Dundee.

As well as using call centres to contact our customers on a regular basis to tell them about BT's products and services, we are increasingly using them to run telemarketing operations on behalf of other companies. In fact, BT now runs more than 100 call centres in the UK.

BT people

At BT, we understand the link between being our customers' "supplier of choice" and our people's "employer of choice". That is why we have such a deep commitment to our people and why we are backing it up by seeking accreditation as an *Investors in People* company.

By the end of March 1998, around 124,700 people were employed by BT, compared with 227,000 seven years ago.

However, during the year, there were increases in certain parts of the business as we have been building on people-intensive activities such as telemarketing and delivering our commitment to world-class quality of service.

We recruited over 500 high-calibre graduates and 500 modern apprentices in the year. BT is a key supporter of the UK Government's New Deal welfare-to-work initiative and plans to help 250 unemployed people get back to work during 1998. We encourage our people to gain appropriate National Vocational Qualifications.

Through our leading-edge policies and programmes, we seek to promote real equality of opportunity throughout the company and actively encourage the employment, training and career development of people with disabilities. We also try to continue to employ any of our people who develop a disability in the course of their career.

In March 1998, BT won top prize in the Opportunity 2000 Awards scheme. These awards recognise UK employers who demonstrate innovative working practices to further women's development at work.

At the 1997 UK Quality Awards, both BT Business Division and BT Northern Ireland were recognised for achievements that led to success for themselves and their customers.

BT is the largest company ever to have won a European Quality Awards prize, and we did so in both 1996 and 1997.

We also run a comprehensive in-house Quality Award scheme. This year's winners included the team which won the bid for the supply and management of an advanced services network for Halifax plc, and the team responsible for a nationwide updating of payphones and phonocard technology.

We conduct a wide-ranging programme of employee opinion research, including an annual company-wide survey. Managers are required to put in place an action plan to address the issues raised by their teams.

The allocation of shares to employees under the BT Employee Share Ownership Scheme amounts to two per cent of annual pre-tax profits.

BT continues to consult and negotiate with recognised unions in the UK as an integral part of our employee relations strategy. We have also set up a European Consultative Council which provides the opportunity

for dialogue with representatives from the UK and all our other European operations. The Council is chaired by Chief Executive Sir Peter Bonfield and meets annually.

Corporate citizenship

BT is committed to being a good corporate citizen.

We were a founder member of the Per Cent Club in 1986, and we continue to commit a minimum of 0.5 per cent of our UK pre-tax profits to activities in support of society through our Community Partnership Programme. Our expenditure has grown from £10 million in 1987 to £15 million in 1998, including total donations to charity of £2.6 million. No contributions were made to any political party.

BT's Community Partnership Programme is the largest of its kind in the UK and concentrates its efforts in the areas of health and welfare, education, regeneration, arts and sports, disability, supporting the community activities of BT people, and the environment. We place particular emphasis on education and training, the improvement of communication skills, support for people with disabilities, and the involvement of BT people.

BT is the lead sponsor of the Department for Education and Employment's "out-of-school-hours clubs" project, which was launched in February 1998. Our funding of £150,000 will enable eight consortia of schools, youth and community organisations across England to establish homework clubs, with adult supervision, for disadvantaged children.

And, every year, 50,000 swimmers take part in the UK's largest participative sporting event, the BT Swimathon, which is also our most successful event for generating media coverage. In eight years, it has raised over £10 million for national charities.

In the last year, we have put in place a programme to enable charities and voluntary groups to make more effective use of communications technology. As part of this, we are collaborating with the charity OneWorld On Line to offer training and support for small charities to help them run their own Internet sites.

BT is also bringing the benefits of the new technology it is developing to the people who need it most. For example, BT and the Anchor Trust are developing remote health monitoring systems to help older people continue to

live independently. And, as part of the BT Hear for All programme, we have been working with the Royal National Institute for Deaf People to improve deaf people's access to arts venues around the country.

In March 1998, we announced that BT would be one of the corporate sponsors of the Millennium celebrations, not just at the Dome in Greenwich but throughout the country. Because we want to make a contribution that will touch everyone's lives in 2000, we will be launching "Mill-e-Mail" – a free electronic mail address service. This means that everyone in the UK over the age of nine will have his or her own e-mail account.

Education

BT has been a key player in the establishment of a "national grid for learning" in the UK. The aim of the grid is to provide networked access to learning resources for pupils and students of all ages, largely via personal computers located in schools, colleges and libraries.

The development of the grid has been influenced by the Bristol Education Online Network project, in which BT, working with ICL, has been a major participant.

The project, benefiting a group of schools in the Bristol area, has demonstrated the gains which can be made by pupils who are given access to leading-edge computers, servers, software and networks. As well as improvements in academic attainments, the schools reported a decline in vandalism and an increase in parental involvement.

In October 1997, the Prime Minister announced a public/private partnership to provide schools with affordable access to the Internet. He said it would mean that, by 2002, all of the UK's 32,000 schools would have "modern computers, education programmes to go on them, teachers skilled to teach on them, pupils skilled to use them, connected to the superhighway for free and with phone bills... as low as £1 per pupil per year."

CampusWorld, BT's Internet-based resource of more than 20,000 pages of educational material, receives more than 100,000 page requests every school day.

BT has one of the most wide-ranging programmes of community support in the education sector and invests around £3 million each year through, amongst other things, award schemes for schools, colleges and universities.

Environment

A company of BT's size inevitably has an impact on the environment through its significant use of energy and other resources, as well as its waste streams. Since an initial review in 1989, we have developed a whole lifecycle approach to environmental management in line with the international environmental management system standard (ISO14001). Targets are set in line with ISO14001 and industry best practice.

Our policy, first published in 1990 and regularly reviewed, covers all significant environmental impacts: procurement, fuel and energy, emissions to air, local impacts, and wastes.

BT now trades electronically with 90 per cent of its largest suppliers, and we have saved at least £10 million as a result. In the majority of these transactions, our supplier does not print or post orders or invoices – everything is done electronically. We aim to expand our electronic trading to include all of our smaller, localised purchasing, covering around 400,000 orders a year and around 1.5 million invoices.

New targets for environmental improvement are set each year and progress is documented in our award-winning Environmental Performance Report.

Later this year, we shall publish a comprehensive set of reports that describe BT's social, environmental and technological interactions with society. Through these reports, we aim to stimulate a wider debate into how BT can contribute to an improved quality of life for all.

Further information

More information about BT and its operations can be found on our Internet site at <http://www.bt.com>

Financial review

Introduction

BT's earnings of 26.7 pence per share for the year ended 31 March 1998 (the 1998 financial year) compare with 32.8 pence for the 1997 financial year and 31.6 pence for the 1996 financial year. Earnings per share for the 1998 financial year were affected by two exceptional items. The first was a receipt of US \$465 million from WorldCom, Inc as a result of the termination of the proposed BT/MCI Communications Corporation merger; the second was the one-off windfall tax charge which amounted to £510 million.

Earnings per share for the 1998 financial year before the two exceptional items were 31.7 pence, a decrease of 3.2% on the previous year, reflecting a number of factors. In the 1998 financial year, earnings were affected by initial expenditure incurred by the group's new European associates as they become established; a charge of £120 million was incurred as compensation to employee share option holders for the special dividend paid in September 1997 and an additional charge for interest of approximately £100 million was incurred from the payment of this special dividend; BT was also affected by its £63 million share of a special charge made by MCI in September 1997.

	1998 £m	1997 £m	1996 £m
Turnover	15,640	14,935	14,446
Other operating income	372	106	103
Operating costs before redundancy costs	(12,249)	(11,429)	(11,028)
Redundancy costs	(106)	(367)	(421)
Operating profit	3,657	3,245	3,100
Group's share of profits (losses) of associated undertakings	(252)	139	82
Profit on sale of group undertakings	63	8	7
Net interest and premium payable	(249)	(189)	(170)
Profit before taxation	3,219	3,203	3,019
Taxation – ordinary	(978)	(1,102)	(1,027)
– windfall	(510)	–	–
Profit after taxation	1,731	2,101	1,992
Minority interests	(25)	(24)	(6)
Profit for the financial year	1,706	2,077	1,986
Earnings per share	26.7p	32.8p	31.6p
Earnings per share before exceptional items	31.7p	32.8p	31.6p

The results for the 1998 financial year have benefited from the strong growth in demand for the group's products and services and the buoyant UK economy. BT, however, continued to be affected by the tight regulatory regime in the UK and growing competition. Price reductions, including those imposed by the price control formulae, totalled over £750 million following reductions of over £800 million in the 1997 financial year and £480 million in the 1996 financial year. The 1998 financial year also included lower redundancy costs as a consequence of the surplus disclosed by the latest actuarial valuation of the group's main pension scheme.

The 1998 financial year saw the group increasing its level of investment in continental Europe to address the opportunities presented by the full liberalisation of the telecommunications market from 1 January 1998. Other features of the year included the break-up of the proposed BT/MCI merger, the payment of a £2.2 billion special dividend and the UK Government's imposition of a windfall tax on BT and other privatised companies.

The results for the 1997 financial year were adversely affected by significant redundancy costs of £367 million and a £60 million premium paid on repurchase of bonds. The 1996 financial year's results were also affected by significant redundancy costs of £421 million and a £73 million share of another MCI special charge.

Regulation and prices

The period to 31 July 1997 was the last in which the majority of BT's main UK services were subject to price regulation. Under the price controls which were in force up to that date, BT had to reduce its overall prices for its main UK services, principally inland and outgoing international call services and exchange line rentals, under the RPI minus 7.5 formula. In the two final price control years under this formula, BT reduced its prices by about 5% and 2% in the years to 31 July 1997 and 1996, respectively.

From 1 August 1997, a new retail price control came into force under which a cap of RPI minus 4.5 applies to the services used by the lowest 80% of BT's residential customers by bill size. This new retail price control is estimated to have covered services representing about 17% of the group's total turnover for the year to 31 March 1998. In the current price control year to 31 July 1998, BT has already reduced its prices by more than the required reduction of 1.56%.

From 1 October 1997, the basis of determining most interconnect charges with other UK operators has been moved from fully allocated historical costs to long-run incremental costs. Annual determinations have been replaced with a system based on RPI minus price caps. There has been an initial reduction in charges of 10% followed by annual reductions over a four-year period based on a RPI minus 8 price cap.

The regulatory environment in the UK has had, and will continue to have, a significant adverse impact on the group's turnover and operating profit. As the group extends its operations to other countries, BT has to consider the regulatory regimes in those countries. Generally, most countries have regulatory regimes that are currently less liberal than those in the UK and North America.

Competition and the UK economy

BT has a significant market share in its main UK markets for telephone calls and provision of exchange lines.

Competition has eroded BT's market share significantly in key market sectors, in particular areas of the UK and for certain products and services. Figures published by Oftel showed that BT had 77% of the market for national calls for the six months ended 30 September 1997, compared with 79% and 81% in the 1997 and 1996 financial years, respectively, and supplied 89% of the exchange lines in the UK at 30 September 1997, compared with 90% and 93% at 31 March 1997 and 1996, respectively. Additionally, BT had 87% of the market for local calls for the six months ended 30 September 1997, compared with 90% and 92% in the 1997 and 1996 financial years, respectively, and 52% of the market for outgoing international calls from the UK for the six months ended 30 September 1997, compared with 61% and 70% in the 1997 and 1996 financial years, respectively.

The growth in networks of cable operators in the UK is having an adverse effect on BT's share of the residential market. In the last three financial years, BT has experienced a small net reduction in residential exchange line connections as a result of increasing competition in certain geographic areas from these cable operators. This reduction is expected to continue as they build out their networks.

In an environment of strong competition, Cellnet had 34% of the market at 31 March 1998, compared with 38% at 31 March 1997 and 41% at 31 March 1996. There has also been a downward pressure on prices. Oftel has referred BT, Cellnet and Vodafone, its direct competitor, to the

Monopolies and Mergers Commission (MMC) for investigation into the charges for calls made from BT's fixed network to Cellnet and Vodafone's networks. The MMC is expected to report in autumn 1998. The company believes that the impact of the investigation is not likely to be significant to the group's financial position in view of the continuing reductions in prices.

The group has seen some diversion of demand from its fixed network as a result of the growth of other licenced operators' activities.

For its operations as a whole, BT expects the competitive pressure to persist and it will continue to defend its market share vigorously and fairly.

The strength of the UK economy is an important determinant of BT's business volumes and the gross domestic product grew by 2.9% in the year ended 31 March 1998, compared with 3.0% and 2.0% in the previous two years.

Turnover

Total turnover grew by 4.7% to £15,640 million in the 1998 financial year after growing by 3.4% in the 1997 financial year compared with the 1996 financial year. The strong growth in demand for the group's products and services of approximately 10% in the 1998 financial year and approximately 8% in the 1997 financial year was partially offset by the effect of price reductions which averaged approximately 5% across the business in each of the two years.

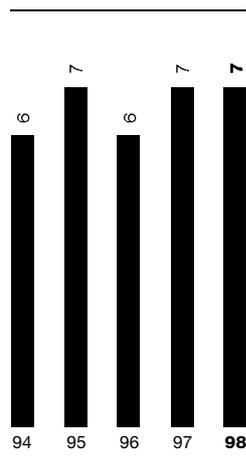

The group's turnover is analysed as follows:

	1998	1997	1996
	£m	£m	£m
Inland calls	4,924	4,874	4,882
International calls	1,553	1,809	1,980
Exchange line rentals	2,957	2,811	2,685
Private circuits	1,149	1,124	1,056
Mobile communications	1,089	949	856
Customer premises equipment supply	896	914	946
Yellow Pages and other directories	466	438	408
Other sales and services	2,606	2,016	1,633
Total turnover	15,640	14,935	14,446

Price reductions had a major impact on turnover from inland calls made over the fixed network for the fourth year in succession. Innovative marketing programmes included

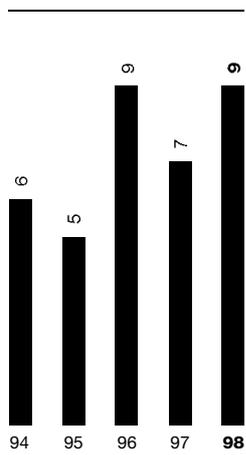

enhancements to the successful Friends & Family package, business discounts and reductions in national and fixed network to mobile call prices. The combined effect of these price changes totalled over £300 million, which was equivalent to a 6% reduction in call prices following falls of 7% in each of the previous two years.

% annual inland call volume growth

In the 1998 financial year, inland call volume growth of 7% was largely offset by the price reduction effect, resulting in total call turnover increasing by 1% in the year to £4,924 million. Fixed network to mobile calls and inbound services, including 0800 numbers, were the main areas of this strong volume growth, together with local and national calls. In the 1997 financial year, call volume growth of 7% almost wholly mitigated the price reduction effect, resulting in total call turnover remaining static compared with the previous year.

% annual international call volume growth

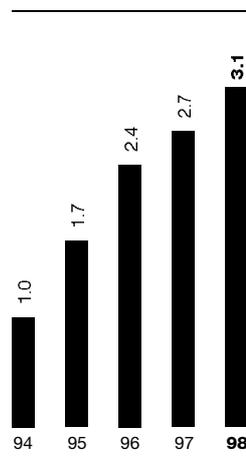

International call turnover declined by 14.2% in the 1998 financial year to £1,553 million after declining by 8.6% in the 1997 financial year. This was primarily the result of price reductions averaging 20% and 13% in the two years, respectively, and the impact of the strengthening of sterling, partially offset by strong volume growth of 9% and 7%, respectively. BT is reducing prices substantially on most international routes.

Turnover from the fixed network line rentals grew by 5.2% in the 1998 financial year to £2,957 million after increasing by 4.7% in the 1997 financial year. The increased turnover was the combined result of the growth in business lines and 3% rental price increases in both July 1996 and July 1997. The number of business lines grew by 5.0% in the 1998 financial year and by 5.3% in the 1997 financial year with ISDN services mainly contributing to this growth. The numbers of residential lines declined slightly in both years due to the competition from cable operators. Overall, BT's total fixed network lines were maintained at 27.6 million in the 1998 financial year after growing by 0.9% in the 1997 financial year.

Private circuit turnover rose by 2.2% in the 1998 financial year to £1,149 million after increasing by 6.4% in the 1997 financial year. Demand for digital KiloStream and MegaStream services continued at a high level in both years, supported by a significant migration from analogue circuits.

Cellnet customers (millions)

Mobile communications turnover increased by 14.8% in the 1998 financial year to £1,089 million following growth of 10.9% in the previous financial year. This reflected the

14% and 12.9% growth in Cellnet's customer-base in the two years, respectively, offset by the effect of reductions in mobile call prices. Cellnet had 3.1 million customer connections at 31 March 1998, 75% of which were on its digital GSM network.

The strong growth in BT's sales of its advanced services, including FeatureNet, its Syncordia Solutions operation, incorporating managed data networks, and Syntegra, the group's systems integration business, were the main elements in the increase of 29% in other sales and services in the 1998 financial year to £2,606 million and the 23% growth in the 1997 financial year. Other significant increases in turnover came from BT's overseas operations and interconnect charges.

BT's turnover from its overseas operations grew strongly. Concert services to multinational customers provided much of the growth in the 1998 financial year. Newly-acquired systems integration businesses in Europe accounted for about half of the growth in the 1997 financial year with Concert services providing much of the balance.

Turnover from UK operators for interconnect charges rose from £265 million in the 1996 financial year to £319 million in the 1997 financial year and to £496 million in the 1998 financial year. These increases reflect the growing market share of BT's UK competitors and the increasing level of traffic flowing into BT from their networks. There was also a corresponding increase in the payments made by BT to these operators for traffic passing to their networks.

Other operating income

Under the terms of an agreement among BT, MCI and WorldCom, BT received US \$465 million on 12 November 1997 as the break-up fee and partial reimbursement of expenses incurred on the BT/MCI merger agreement. This receipt, net of relevant expenses incurred in the 1998 financial year, has been included as an exceptional profit of £238 million in other operating income in the group's profit and loss account for this year.

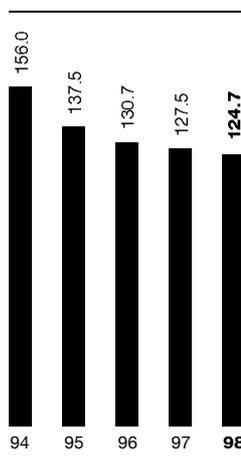

Operating costs

Total operating costs increased by 4.7% in the 1998 financial year to £12,355 million after increasing by 3.0% in the 1997 financial year. As a percentage of turnover, operating costs decreased from 79.3% in the 1996 financial year to 79.0% in the 1997 and 1998 financial years.

	1998 £m	1997 £m	1996 £m
Staff costs	3,917	3,778	3,680
Own work capitalised	(424)	(399)	(417)
Depreciation	2,395	2,265	2,189
Payments to telecommunication operators	1,600	1,476	1,383
Other operating costs	4,761	4,309	4,193
Total operating costs, before redundancy charges	12,249	11,429	11,028
Redundancy charges	106	367	421
Total operating costs	12,355	11,796	11,449

Staff costs increased by 3.7% in the 1998 financial year to £3,917 million, after rising by 2.7% in the 1997 financial year. The increase in the 1998 financial year was the result of the effects of the annual pay awards and compensation for the special dividend, offset by savings resulting from reduced pension costs. The compensation of £120 million for the special dividend is for those employees holding unexercised rights, mainly under group-wide sharesave schemes, which lost value on the payment of the special dividend in September 1997.

Employees (thousands)

The allocation for the employee share ownership scheme in the 1998 and 1997 financial years was £64 million, representing 2% of pre-tax profit for those years. In the 1996 financial year approximately 1% was allocated. In the 1997 financial year, the increase in staff costs was the result of this higher allocation for the employee share ownership scheme as well as the annual pay awards and staff costs in

acquired subsidiaries, offset by savings resulting from staff reductions.

The depreciation charge increased by 5.7% in the 1998 financial year to £2,395 million after increasing by 3.5% in the 1997 financial year, reflecting BT's continuing high level of investment in its networks.

Payments to other telecommunication operators grew by 8.4% in the 1998 financial year to £1,600 million after increasing by 6.7% in the 1997 financial year, primarily as a result of the growing number of calls terminating on UK competitors' networks. Payments to overseas operators for incoming calls terminating in the UK fell significantly in both years as a consequence of falling prices and the strengthening of sterling more than offsetting call volume growth.

Other operating costs, which rose by 10.5% in the 1998 financial year to £4,761 million and by 2.8% in the 1997 financial year, include the maintenance and support of the networks, accommodation and marketing costs, the costs of BT's overseas operations and the cost of sales of customer premises equipment. In the UK's increasingly competitive telecommunications market, BT is spending significantly more on its marketing programmes, including extensive TV advertising, and this has been one of the three main factors behind the increase in costs. The others have been the costs incurred in supporting the recent rapid expansion of Cellnet and Concert.

Redundancy costs of £106 million were incurred in the 1998 financial year, compared with £367 million in the 1997 financial year and £421 million in the 1996 financial year. The significant reduction in costs in the 1998 financial year is a consequence of a surplus arising in BT's main pension scheme. In view of this surplus, described below, and in accordance with BT's accounting policies, redundancy charges for the 1998 financial year do not include the costs of the incremental pension benefits provided to early retirees. In the 1997 and 1996 financial years, redundancy costs included £258 million and £266 million relating to incremental pension benefits, respectively.

Operating profit

Operating profit for the 1998 financial year of £3,657 million was £412 million (12.7%) higher than in the previous year. In the 1997 financial year, operating profit was 4.7% higher than in the 1996 financial year.

Associates

As a consequence of the termination of the BT/MCI merger agreement and BT's agreement with WorldCom to vote in favour of the proposed MCI/WorldCom merger, BT ceased treating MCI as an associate from 1 November 1997. The group's share of its associates' results for the 1998 financial year incorporates a loss of £27 million, representing BT's share of MCI's results up to that date, which include a special charge of £63 million.

Excluding MCI, the group's share of losses of associates totalled £225 million in the 1998 financial year. The principal loss arose in Viag Interkom which is building its initial network to compete in the German market. Smaller losses were incurred by Telfort in the Netherlands and Cegetel in France, which has been an associate since September 1997.

The group's £139 million share of profits of associated undertakings in the 1997 financial year consisted primarily of the company's share of MCI's profits less BT's share of losses in its joint ventures in Germany and Sweden which were commencing establishing their businesses. BT's share of MCI's pre-tax profit for the 1997 financial year amounted to £175 million, under BT's accounting policies, and was significantly higher than the corresponding figure of £101 million for the 1996 financial year which had been adversely affected by a restructuring charge, BT's share of which was £73 million.

BT expects that its associates in Europe as a whole will continue to incur losses for the next two to three financial years.

Interest charge and bond repurchase premium

Following payment of the special dividend in September 1997, described below, the group's borrowings have increased significantly and its interest charge has risen commensurately. Consequently, in the 1998 financial year, the group's net interest charge of £249 million was £120 million higher than the interest charge in the previous year. Interest cover represents 14.7 times operating profit and is expected to continue at a comfortable level.

The net interest charge of £129 million for the 1997 financial year was £41 million lower than the interest charge in the 1996 financial year. The group's strong positive cash flow was the main contributor to this lower charge which was covered 25.2 times by operating profit.

During August 1996, the company took the opportunity to repurchase two of the three then-remaining series of Government held bonds for £422 million, at an effective premium of £60 million which was charged against profit in the 1997 financial year in accordance with UK accounting standards. The last-remaining series was repaid on its maturity in March 1997. The repurchase has reduced the overall effective interest rate on BT's borrowings.

Profit and taxation

The group's profit before taxation for the 1998 financial year was £3,219 million, compared with £3,203 million in the 1997 financial year and £3,019 million in the 1996 financial year.

The tax charge for the 1998 financial year includes BT's £510 million share of the UK Government's windfall tax on certain privatised companies, imposed in July 1997. The first £255 million instalment was paid on 2 December 1997 with the second being payable in December 1998.

The ordinary tax charge of £978 million as a percentage of profit before taxation was 30.4%, compared with 34.4% for the 1997 financial year and 34.0% for the 1996 financial year. The group's ordinary tax charge for the 1998 financial year is an effective 31.5% of pre-tax profit, excluding the MCI merger break-up fee which is effectively subject to a lower tax charge under UK capital gains tax legislation. This effective tax charge reflects the lower 31% rate of corporation tax set for the year, compared with 33% set for the previous two financial years. The higher effective rate in the 1997 financial year was due to the premium on the bond repurchase only being partially deductible for tax purposes.

Earnings and dividends

Earnings per share, based on a profit for the 1998 financial year of £1,706 million, were 26.7 pence. Earnings before the two exceptional items were 31.7 pence per share, in comparison with 32.8 pence for the 1997 financial year and 31.6 pence for the 1996 financial year.

As originally announced in November 1996, the company paid a special dividend of 35 pence per share in September 1997. This dividend absorbed £2,244 million. The Board believed that shareholder value and earnings growth would be enhanced through the introduction of more gearing which was achieved with this payment.

To maintain the yield on the company's shares, the Board has adjusted the level of ongoing annual dividends

to take into account the effect of the special dividend. This adjustment was first made for the interim dividend for the year ended 31 March 1998.

The ordinary dividends paid and recommended for the 1998 financial year of 19.0 pence per share represent a 6.4% increase on the previous year, adjusted for the effect of the special dividend, and are covered 1.8 times by earnings, excluding the effect of the windfall tax. These dividends comprise the interim dividend of 7.55 pence per share, which was paid in February 1998, and the proposed final dividend of 11.45 pence per share which, if approved at the annual general meeting, will be paid on 21 September 1998 to shareholders on the register on 7 August 1998. The proposed final dividend is that forecast by the Board in its announcement in October 1997. These ordinary dividends will absorb £1,220 million. For the 1997 and 1996 financial years, ordinary dividends of 19.85 pence and 18.7 pence per share, respectively, were paid or recommended.

Financing

	1998 £m	1997 £m	1996 £m
Net cash inflow from operating activities	6,076	6,192	5,834
Net cash outflow for returns on investments and servicing of finance	(160)	(220)	(150)
Tax paid	(1,886)	(1,045)	(784)
Capital expenditure and financial investment	(3,108)	(2,820)	(2,500)
Acquisitions and disposals	(1,501)	(252)	(132)
Equity dividends paid	(3,473)	(1,217)	(1,138)
Net cash inflow (outflow) before management of liquid resources and financing	(4,052)	638	1,130
Management of liquid resources	2,247	(504)	(1,317)
Net cash inflow (outflow) from financing	1,794	(224)	215
Net increase (decrease) in cash and cash equivalents	(11)	(90)	28
Decrease (increase) in net debt	(3,860)	849	1,319

Net cash inflow from operating activities of £6,076 million in the 1998 financial year compared with £6,192 million in the 1997 financial year and £5,834 million in the 1996 financial year. The higher net cash inflow in the 1997 financial year

than in the 1998 or 1996 financial years reflected a reduction in working capital in the 1997 financial year.

Tax paid in the 1998 financial year totalled £1,886 million. It was particularly high because of £561 million advance corporation tax paid in October 1997 in respect of the special dividend and £255 million paid in December 1997 as the first windfall tax instalment. This advance corporation tax will reduce the group's overall tax payment in the 1999 financial year. The tax paid in the 1997 financial year, principally relating to the prior year's profit, amounted to £1,045 million and the increase of £261 million on the previous year was mainly due to the higher level of profit made in the 1996 financial year compared with the prior year.

The UK Government is changing the pattern of corporation tax payments from April 1999 by requiring companies to pay tax in quarterly instalments starting at the half year stage in each financial year. The changes are being phased in and are in place of the current main single corporation tax payment made nine months after the financial year end and advance corporation tax payments associated with dividends. It is expected that the effect of these accelerated payment arrangements will be to increase the tax payments to be made by the group in the 2000 and 2001 financial years, notwithstanding the reduction in the standard rate of corporation tax to 30% announced by the Government for those years.

Net cash outflow of £3,108 million for capital expenditure and financial investment in the 1998 financial year mainly comprises expenditure on plant, equipment and property and compares with £2,820 million in the 1997 financial year and £2,500 million in the 1996 financial year.

The net cash outflow on acquisitions totalled £1,501 million in the 1998 financial year, the principal part of which was the investment in Cegetel.

Equity dividends paid in the 1998 financial year totalled £3,473 million and included the special dividend of £2,244 million in September 1997. In the two previous financial years dividends of £1,217 million and £1,138 million were paid.

The resulting cash outflow, before liquid resources and financing, of £4,052 million in the 1998 financial year was mainly financed by the issue of new loans in the first two months of the year, principally two Eurobonds totalling

US \$2,500 million, and by using the group's existing short-term investments. In the two previous financial years, the group had positive net cash inflows before financing of £638 million and £1,130 million, respectively.

The cash outflow caused mainly by the special dividend payment and the investment in Cegetel resulted in net debt rising to £3,977 million at 31 March 1998. Balance sheet gearing stood at 36 per cent at that date.

In the 1998 financial year, the group borrowed £1,637 million in long-term loans and long-term debt repaid totalled £338 million. BT issued a US\$1.5 billion five-year 6¾% Eurobond in April 1997 and a US\$1.0 billion ten-year 7% Eurobond in May 1997 in preparation for the group's cash requirements later in 1997.

The cash dividend payment has been reduced by £18 million as the company's scrip dividend scheme operated for the first time in the 1998 financial year. 3.8 million new shares were issued as a consequence as further described in note 22 to the financial statements.

Treasury policy

The group has a centralised treasury operation. Its primary role is to manage liquidity, funding, investment and the group's financial risk, including risk from volatility in currency and interest rates and counterparty credit risk. The treasury operation is not a profit centre and the objective is to manage risk at optimum cost.

The Board sets the department's policy and its activities are subject to a set of controls commensurate with the magnitude of the investments and borrowings under its management. Counterparty credit risk is closely monitored and managed within controls set by the Board. Derivative instruments including forward foreign exchange contracts are entered into for hedging purposes only.

Capital resources and foreign currency exposure

The directors have a reasonable expectation that the group has adequate resources to continue in operational existence for the foreseeable future and therefore they continue to adopt the going concern basis in preparing the financial statements.

At 31 March 1998, the group had cash and short-term investments of £793 million. At that date, £550 million of short-term debt was outstanding. In addition, the group had

unused committed short-term bank facilities, amounting to approximately £786 million at 31 March 1998, in support of a commercial paper programme or other borrowings. The group also has substantial uncommitted short-term bank facilities.

The gearing or ratio of net debt (borrowings net of cash and short-term investments) to shareholders' equity and minority interests was 36.1% at 31 March 1998, compared with 1.6% at 31 March 1997. The group had £3,977 million net debt at 31 March 1998, an increase of £3,801 million in the year. Net debt has increased substantially during the course of the 1998 financial year primarily as a result of the special dividend payment and the investment in Cegetel.

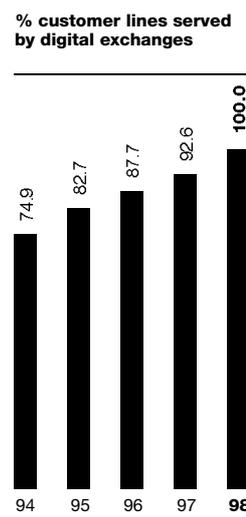

The majority of the group's long-term borrowings has been, and is, subject to fixed interest rates. The group has entered into interest rate swap agreements with commercial banks and other institutions to vary the amounts and period for which interest rates are fixed. At 31 March 1998, the group had outstanding interest rate swap agreements with notional principal amounts totalling £1,489 million.

Most of the group's current turnover is invoiced in pounds sterling, and most of its operations and costs arise within the UK. The group's foreign currency borrowings, which totalled £2,316 million at 31 March 1998, are used to finance its UK operations and to finance the groups' overseas investments, including MCI, in order to reduce the currency exposure on the underlying assets. Cross currency swaps and forward foreign exchange contracts have been entered into to reduce the foreign currency exposure on the group's operations and the group's net assets. The group also enters into forward foreign exchange contracts to hedge investment, interest expense, purchase and sale commitments. The commitments hedged are principally US dollars. As a result of these policies, the group's exposure to foreign currency arises mainly on the residual currency exposure on overseas investments and on any imbalances between the value of outgoing, transit and incoming international calls with overseas telecommunication operators. To date, these imbalances have not been material. As a result, the group's profit has not been materially affected by movements in exchange rates.

The group is not significantly exposed to changes in interest rates. Based upon the composition of net debt at 31 March 1998, a one percentage point change in interest rates would change the group's interest expense by less than £10 million. Apart from the potential proceeds from the sale of the group's holding in MCI, the group is also not significantly exposed to changes in currency rates. Excluding the MCI investment, a 10% change in sterling against major currencies would cause the group's net assets at 31 March 1998 to change by less than £150 million, with insignificant effect on the group's profit. Because the foreign exchange contracts are entered into as a hedge of sales and purchases, a change in the fair value of the hedge is offset by a corresponding change in the value of the underlying sale or purchase.

If market conditions are appropriate, the company will consider making repurchases of its own shares. Authority to purchase up to 10% of the company's issued share capital is to be requested by the directors at the annual general meeting of shareholders to be held in July. Decisions on the amount of cash, if any, to be used in buying back shares and the precise timing will depend in part on market conditions and other opportunities that exist for the deployment of the group's cash resources.

Capital expenditure

Capital expenditure on plant, equipment and property totalled £3,030 million in the 1998 financial year, compared

with £2,719 million in the 1997 financial year and £2,771 million in the 1996 financial year. There has been an increased emphasis on enhancing the intelligence of the network to enable customers to benefit from advanced services and improving the network's capacity for carrying high-speed data. Additionally, Cellnet has continued expanding its digital cellular GSM network.

The group expects capital expenditure in the 1999 financial year to be at a level similar to that of the 1998 financial year. BT expects that future capital expenditure will be provided from net cash inflows from operating activities supplemented, if appropriate, by external financing.

Acquisitions and joint ventures

The group has invested over £1,650 million in the 1998 financial year on acquiring interests in associated companies and other investments and providing their further funding. The most significant investment was the completion in September 1997 of the group's acquisition of a 26% interest in Cegetel for a total of £1,029 million. Cegetel, the second French telecommunications operator, has an 80% interest in SFR, a leading mobile provider in France. Over £400 million has been invested in other European telecommunications companies in the year, primarily in Germany, Spain and the Netherlands. The goodwill arising on all of these acquisitions amounted to £869 million out of a total of £937 million, which has been written off to reserves.

In the previous financial year, the group acquired the Rijnhaave group, a Netherlands-based systems integration business in April 1996 and, in March 1997, completed the formation of Telfort, a joint venture with NS, the Dutch railways company, to offer telecommunication services in that country. In February 1997, BT agreed to acquire the 50% interest in its Spanish joint venture it did not already own, thereby obtaining full control; this transaction was completed in July 1997. The goodwill arising on these acquisitions amounted to £166 million; the remaining goodwill taken to reserves in the 1997 financial year of £33 million mainly related to BT's share of goodwill arising on MCI's acquisitions, principally on its joint venture in Mexico.

Return on capital employed

The group made a return of 19.3% on the average capital employed, on a historical cost basis, in its business in the year ended 31 March 1998, compared with returns of 18.9% and 18.3% in the two previous years.

% return on capital employed

Pensions

An actuarial valuation of BT's main pension fund as at 31 December 1996 was completed during the 1998 financial year. This valuation revealed the fund to be in surplus to an amount of approximately £66 million, with assets of the fund at £19,879 million at that date covering just over 100% of the fund's liabilities, in contrast to an asset coverage of 97% at 31 December 1993. The improvement in the funding position principally arose from the strong return on the fund's assets in the three intervening years more than outweighing the impact of redundancies on the fund. The actuarial valuation took into account the effect of the Government's measures in July 1997 to end pension funds' ability to reclaim the tax credit associated with UK companies' dividends. Without this measure the surplus in the fund would have been significantly higher.

From 1 April 1997, the annual pension charge was based on the December 1996 valuation and was £114 million lower than the charge of £291 million in the 1997 financial year. This revised charge took into account the amount of the pension provision which had been established over recent years in the group's accounts and which stood at £1,224 million at 31 March 1998. Additionally, under UK accounting standards, the cost of providing incremental pension benefits for early leavers has no longer been charged against the profit in the period in which people leave, since the latest actuarial valuation of the pension fund indicates a surplus.

The actuarial valuation confirmed that the group's contribution into the fund should continue at 9.5% of employees' pensionable pay.

The number of retired members and other current beneficiaries in the pension fund has been increasing in recent years and, at 31 December 1997, was approximately 45% higher than the number of active members.

Consequently, BT's future pension costs and contributions will depend to a large extent on the investment returns of the pension fund and could fluctuate in the medium term.

MCI/WorldCom merger

On 1 October 1997, WorldCom announced its intention to offer shares in its company to MCI shareholders as an alternative to the proposed BT/MCI merger. Following an improved offer from WorldCom in November 1997, BT agreed that it would support the proposed merger of MCI with WorldCom to which the MCI board had agreed on the same day. Consequently, the proposed merger between BT and MCI, originally announced in November 1996, was terminated.

Under the WorldCom agreement, BT will sell its holding of 136 million Class A common shares in MCI to WorldCom for US\$51 per share in cash at the time the MCI/WorldCom merger is completed. WorldCom expects the merger, which is subject to regulatory clearance, to be completed later in 1998. At that time, BT will account for the proceeds of approximately US\$7 billion and the consequent profit on the sale of its investment, which will depend on the sterling:US dollar exchange rate.

Also under the WorldCom agreement, BT has agreed to acquire MCI's 24.9% equity interest in the Concert Communications Services joint venture at a price to be negotiated.

Year 2000

The BT Year 2000 Programme deals with all the issues arising from the inability of many computer systems and electronic devices to deal with the year 2000 date change and other critical event-related dates. BT takes the Year 2000 issue very seriously and has established a comprehensive group-wide business programme which is monitored regularly at Board level. BT has estimated the total cost to be in the region of £300 million representing primarily the upgrading of existing software and including internal costs. Current forecasts indicate that the programme is being managed within budget.

The programme has been in place since 1995 and BT aims to achieve compliance with substantially all of its major systems by 31 December 1998. BT recognises, however, its

dependence on suppliers with whom it is working closely. Both BT's suppliers and the BT programme have been making progress and the company's intention is that telecommunications services provided by BT in the UK will not be significantly affected and that customers will continue to receive the current levels of service and care. One of BT's current priorities is to build the same level of confidence in international services which are heavily dependent on overseas telecommunications companies. Although BT does not yet have sufficient information to guarantee current levels of service to all international destinations, it has been instrumental in a number of initiatives aimed at improving the global situation and BT will continue to work closely with government, international bodies and with the companies themselves.

BT is also working actively with its customers, suppliers and UK organisations to secure appropriate contingency plans, both internally and at a national level.

Impact of inflation

In accordance with a requirement of BT's main licence, the group's annual accounts for the 1997 financial year prepared on a current cost basis were published in September 1997. These accounts showed that the group's current cost profit before tax was £2,419 million, compared with £3,203 million under the historical cost convention. The group's current cost total assets at 31 March 1997 were £29,225 million, compared with £25,062 million under its historical cost accounts. The current cost accounts for the 1998 financial year are to be published by 30 September 1998.

Environment

When removing old analogue exchange equipment from buildings, BT recycles the metal content and takes special care to ensure that any hazardous materials are properly disposed. Although BT receives proceeds from the sale of recovered materials, this is more than offset by the cost of dealing with hazardous materials, contracting and planning their removal and preparing the released site for further development. BT believes that the total cost of dealing with these hazardous materials will not be significant.

Goodwill and intangibles

From the 1999 financial year, BT will be adopting the new UK accounting standard on goodwill and intangibles (FRS10). Under this standard, all goodwill arising on acquisitions made after 1 April 1998 will be capitalised and amortised over its useful economic life.

The net impact on the group's accounts of this change will depend on the extent of any acquisitions which may be made and the level of goodwill involved.

Segmented information

BT essentially operates as a unitary business, providing an integrated range of telecommunications products and services. Accordingly, BT does not publish separately the operating profit for the various sources of turnover described above. In the 1998 financial year, approximately 96% of the group's turnover was generated by operations in the UK, compared with 97% in the 1997 financial year and 98% in the 1996 financial year.

BT is required under its main licence to publish disaggregated financial information for various activities of the group, which have been used as the basis of charges paid by other telecommunication operators in the UK for the use of BT's network. The activities presented separately in the regulatory financial statements do not necessarily correspond with any businesses separately managed, funded or operated within the group. The results set out in these statements for the 1997, 1996 and 1995 financial years showed that the group's operating profit is derived predominantly from local, national and international calls, after taking account of an operating deficit arising on the provision of exchange lines.

For its 1999 financial year, BT will be providing disaggregated financial information in accordance with the requirements of the US SFAS No 131 which requires such information to be analysed in a similar manner to that used by management in managing the business.

US GAAP

The group's net income and earnings per share for the three financial years ended 31 March 1998 and shareholders' equity at 31 March 1998 and 1997 under US Generally Accepted Accounting Principles (US GAAP) are shown in note 30 to the financial statements.

Differences between UK GAAP and US GAAP include results of the differing accounting treatment of pension costs, redundancy costs, intangible assets, goodwill,

deferred taxation, capitalisation of interest and dividends. The earnings per share under US GAAP are calculated in accordance with SFAS 128 for the first time. Prior year figures have been restated. However, there are no significant differences in earnings to those determined under the previous method. Cash flow information under the US GAAP presentation is also shown in note 30.

Board of directors

EXECUTIVE DIRECTORS

Sir Iain Vallance *Chairman (d) 1*

Sir Iain was appointed a director in 1984. He served as Chief Executive from 1986 to the end of 1995 and has been Chairman since 1987. Sir Iain will become part-time Chairman from 31 July 1998. He is also a non-executive vice-chairman of Royal Bank of Scotland, a non-executive director of Mobil Corporation and Scottish Enterprise, vice-chairman of the European advisory committee of The New York Stock Exchange and chairman of the Princess Royal Trust for Carers. Aged 55.

Sir Peter Bonfield CBE *Chief Executive (a) 2*

Sir Peter was appointed to the Board on 1 January 1996 as Chief Executive. He chairs the *Group Executive Committee*. Sir Peter is a fellow of the Royal Academy of Engineering and the Institution of Electrical Engineers. From 1981 to 1995, he worked for ICL, latterly as chairman and chief executive. He is currently non-executive deputy chairman of ICL, a non-executive director of MCI Communications Corporation and Zeneca, and vice president of the British Quality Foundation. Aged 53.

Robert P Brace FCA *Group Finance Director (a) (e) 3*

Robert Brace joined the company in 1989 and was appointed to the Board in 1993 as Group Finance Director. A career-long finance professional, he started with Peat Marwick Mitchell (KPMG) in 1971 and subsequently held senior finance roles with Unipart and Black & Decker. Robert Brace is also a non-executive director of MCI Communications Corporation. Aged 48.

Bill Cockburn CBE, TD *Group Managing Director, BT UK (a) 4*

Bill Cockburn joined the company on 1 October 1997 as Group Managing Director of BT's UK business and was appointed to the Board with effect from 1 April 1998. After a career in the Post Office, he became chief executive in 1992. In November 1995, Bill Cockburn joined WH Smith as a director, becoming chief executive in 1996. He is a non-executive director of Centrica and Lex Service, a member of the Business in the Community board and a trustee of the Princess Royal Trust for Carers. Aged 55.

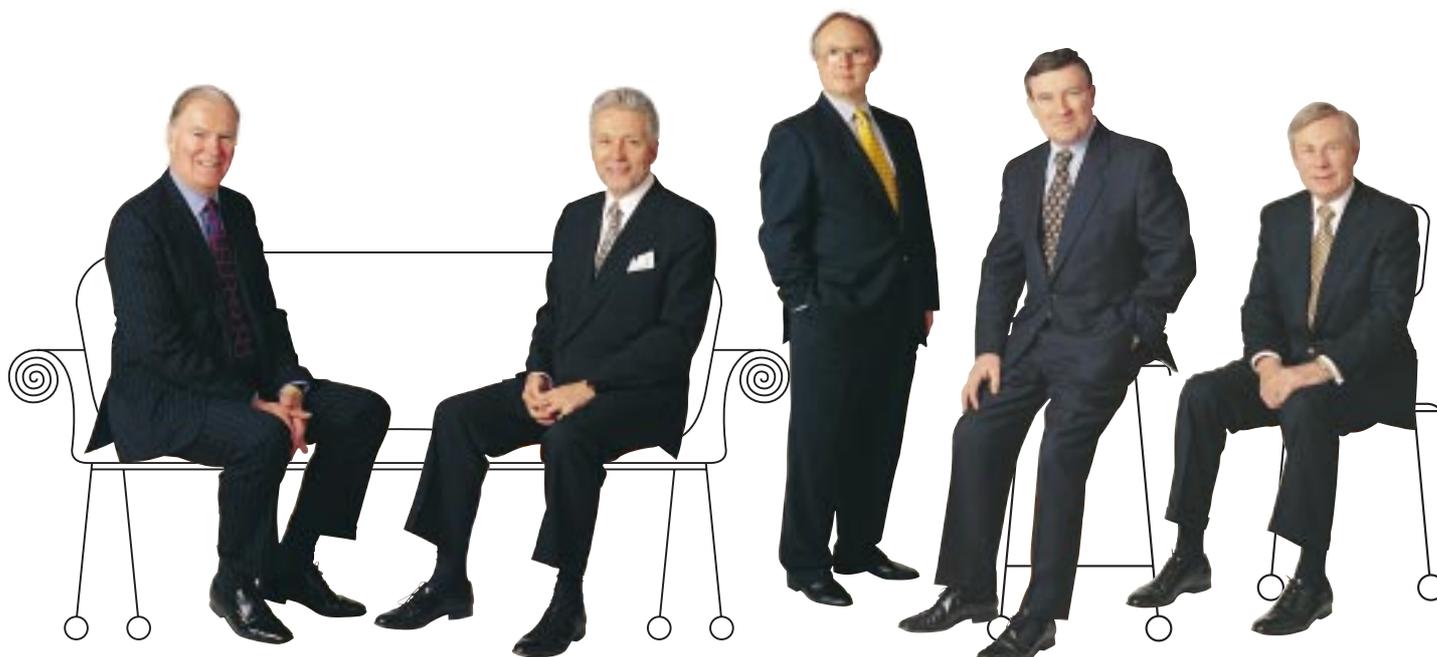

NON-EXECUTIVE DIRECTORS

Sir Colin Marshall *Deputy Chairman (b) (c) (d) * 5*

Sir Colin was appointed to the Board in 1995 and became Deputy Chairman in January 1996. He is chairman of British Airways. Sir Colin is also chairman of Inchcape, deputy chairman of Siebe, a non-executive director of HSBC Holdings and The New York Stock Exchange, and president of the Confederation of British Industry. Aged 64.

Helen Alexander * 7

Helen Alexander will join the Board on 1 June 1998. She has been chief executive of The Economist Group since January 1997. Helen Alexander joined The Economist in 1984 and was managing director of The Economist Intelligence Unit from 1993 to the end of 1996. She is also a non-executive director of Northern Foods, a member of the Final Selection Board for the British Home Civil and

1

2

3

4

5

Diplomatic Service, and a member of the ethics committee of the University College London Hospitals. Aged 41.

Dr Iain Anderson (b) (c) (d) (e) * 6

Dr Anderson was appointed to the Board in 1995. He is the strategy and technology director of Unilever, for whom he has worked since 1965. Dr Anderson joined the Unilever board in 1988. He has post-doctorate qualifications in microbiology from both Glasgow and Massachusetts Universities. Aged 59.

Malcolm Argent CBE (b) (d) (e) (f) 9

Company Secretary from 1984 to 1994, Malcolm Argent was appointed to the Board in 1989, retiring to a non-executive role in 1994. He is deputy chairman of the Civil Aviation Authority, chairman of National Air Traffic Services and a non-executive director of Clerical Medical Investment Group and Westminster Health Care Holdings. Aged 62.

Sir Ewen Fergusson GCMG, GCVO (c) (d) * 10

Sir Ewen was appointed a director in 1993, having retired as HM Ambassador to France after a 36-year career in the Diplomatic Service. He is non-executive chairman of Coutts & Co and The Savoy Hotel. Aged 65.

Neville Isdell Ireland * 8

Neville Isdell will join the Board on 1 July 1998. Formerly president of The Coca-Cola Group's greater Europe group, he is currently managing Coca-Cola Amatil's European operations before assuming the position of chairman and chief executive of Coca-Cola Beverages, a new European bottling company. Neville Isdell joined Coca-Cola in 1968

and has held a number of posts managing Coca-Cola's businesses in various parts of the world. He has served on the boards of the publicly-quoted Coca-Cola Enterprises US and Coca-Cola Amatil Australia. Aged 54.

Keith Oates (b) (c) (d) * 11

Keith Oates was appointed to the Board in 1994. He is deputy chairman and managing director of Marks and Spencer and a non-executive director of Diageo. Keith Oates' international experience includes working for IBM and Black & Decker. He is a member of the Financial Services Authority and the English Sports Council and a former governor of the BBC. Aged 55.

COMPANY SECRETARY

Colin R Green (a)

Colin Green, a solicitor, was appointed Secretary and Chief Legal Adviser in 1994. Aged 49.

Key to membership of principal Board committees:

- (a) Group Executive Committee
- (b) Audit Committee
- (c) Remuneration Committee
- (d) Nominating Committee

Report of the directors

The directors submit their report and the audited financial statements of the company, British Telecommunications plc, and the group, which includes its subsidiary undertakings, for the year ended 31 March 1998.

Introduction

The business review on pages 6 to 14, the financial review on pages 15 to 25, the discussion on corporate governance on pages 30 to 32 and the report on directors' remuneration on pages 33 to 40 form part of this report. The audited financial statements are presented on pages 45 to 79.

Principal activity

The group's principal activity is the supply of telecommunication services and equipment. In the year, 96% of group turnover arose from operations in the United Kingdom.

Directors

The names and biographical details of the directors of the company are given on pages 26 and 27. All served throughout the financial year, with the exception of Bill Cockburn who was appointed to the Board as from 1 April 1998 and Helen Alexander and Neville Isdell who will join the Board on 1 June 1998 and 1 July 1998, respectively.

In addition, Yve M Newbold, Dr Alan W Rudge CBE, Gerald H Taylor, Bert C Roberts Jnr and Birgit Breuel served on the Board until their retirement as directors on 30 June 1997, 31 October 1997, 9 November 1997, 17 March 1998, and 31 March 1998, respectively.

In accordance with the articles of association, Bill Cockburn, Helen Alexander and Neville Isdell, having been appointed to the Board since the last annual general meeting, retire at the forthcoming annual general meeting and will be proposed for election. Sir Colin Marshall and Malcolm Argent retire by rotation and will be proposed for re-election. Details of these directors' service contracts or contracts of appointment are included in the report on directors' remuneration on page 36 and the discussion on corporate governance on page 30, respectively.

On 22 May 1998, BT announced that Sir John Weston, who retires as Britain's Ambassador to the United Nations at the end of June, is to join the Board as a non-executive director on 1 October 1998.

Substantial shareholdings

At 26 May 1998, the company had received a notification from the Prudential Corporation group of companies under Part VI of the Companies Act 1985 in respect of a holding of 247 million shares representing 3.9% of the company's issued ordinary share capital.

Policy on the payment of suppliers

BT's policy is to use its purchasing power fairly and to pay promptly and as agreed.

BT has a variety of payment terms with its suppliers. The terms for payments for purchases under major contracts are settled when agreeing the other terms negotiated with the individual suppliers. It is BT's policy to make payments for other purchases within thirty working days of the invoice date, provided that the relevant invoice is presented to the company in a timely fashion and is complete. BT's payment terms are printed on the company's standard purchase order forms or, where appropriate, specified in individual contracts agreed with suppliers. The ratio, expressed in days, between the amounts invoiced to the company by its suppliers in the year ended 31 March 1998 and the amounts owed to its trade creditors at the end of the year was 29 days.

Auditors

A resolution to reappoint Coopers & Lybrand as the company's auditors and authorise the directors to settle their remuneration will be proposed at the annual general meeting.

Annual general meeting resolutions

The resolutions to be proposed at the annual general meeting to be held on 15 July 1998, together with explanatory notes, appear in the separate *Notice of 1998 Annual General Meeting* sent to all shareholders.

By order of the Board

C R Green

Secretary and Chief Legal Adviser

Auditors' report on corporate governance matters

TO BRITISH TELECOMMUNICATIONS plc

In addition to our audit of the financial statements, we have reviewed the directors' statements on pages 21, 30 and 31 concerning the company's compliance with the paragraphs of the Cadbury Code of Best Practice specified for our review by the London Stock Exchange's Listing Rules and their adoption of the going concern basis in preparing the financial statements. The objective of our review is to draw attention to non-compliance with paragraphs 12.43(j) and 12.43(v) of the Listing Rules.

Basis of opinion

We carried out our review in accordance with guidance issued by the Auditing Practices Board. That guidance does not require us to perform the additional work necessary to, and we do not, express any opinion on the effectiveness of either the group's system of internal financial control or its corporate governance procedures nor on the ability of the group and company to continue in operational existence.

Opinion

With respect to the directors' statements on internal financial control on page 31 and going concern on page 21, in our opinion the directors have provided the disclosures required by the Listing Rules referred to above and such statements are not inconsistent with the information of which we are aware from our audit work on the financial statements.

Based on enquiry of certain directors and officers of the company, and examination of relevant documents, in our opinion the directors' statement on page 30 appropriately reflects the company's compliance with the other aspects of the Code specified for our review by paragraph 12.43(j) of the Listing Rules.

Corporate governance

The directors consider that throughout the year BT has fully complied with the *Code of Best Practice* published by the *Committee on the Financial Aspects of Corporate Governance* (the “Cadbury Committee”) and Section A of the best practice provisions of the Stock Exchange Listing Rules introduced following the publication of *Directors’ Remuneration – Report of a Study Group chaired by Sir Richard Greenbury* (the “Greenbury Report”), except in respect of non-executive directors’ remuneration. This is explained on page 36.

The Board

The Board meets every month, except August. Its principal focus is the overall direction and control of the group. Key matters, such as the group’s strategic plans, annual operating plan and budget and the company’s operating and financial performance, are reserved for the Board to approve or monitor.

BT aims to have the Board comprise approximately two-thirds non-executive directors. Four of the current non-executive directors are independent of the management of BT either being free from any business or other relationship which could materially interfere with the exercise of their judgement or not previously involved in the management of BT. The three new non-executive directors joining the Board are all independent. Between them the non-executive directors bring experience at a senior level of international business operations, marketing, doing business in the key markets in which the group now operates and international affairs.

The non-executive directors provide a strong independent element on the Board, with Sir Colin Marshall, Deputy Chairman, as the senior independent member. However, the Board operates as a single team.

Non-executive directors are normally appointed initially for three years. Towards the end of that period the Board will consider whether to continue the appointment, which will then become terminable on twelve months’ notice from either BT or the director. Appointments will be reviewed again by the Board before the end of the sixth year. Normally, appointments will be for a maximum of ten years. The Deputy Chairman’s contract was renewed for a second three-year term from 1 April 1998. It may be terminated on twelve months’ notice. Malcolm Argent’s contract is for a one-year term ending on 31 December 1998. Helen Alexander’s, Neville Isdell’s and Sir John Weston’s contracts will be for an initial three-year term.

All directors are required by the company’s articles of association to be elected by shareholders at the first annual general meeting after their appointment. One-third of other directors must seek re-election by the shareholders each year. In effect, this means directors are re-elected every three years.

The executive directors have service agreements which are reviewed by the *Remuneration Committee*. Information about the periods of these contracts is in the report on directors’ remuneration.

The Board has agreed and established a procedure for directors, in furtherance of their duties, to take independent professional advice if necessary, at the company’s expense. In addition, all directors have access to the advice and services of the Company Secretary, the removal of whom would be a matter for the whole Board. He advises the Board on appropriate procedures for the management of its meetings and duties and the implementation of corporate governance and compliance in the group.

On appointment, directors receive appropriate information about BT, such as a description of the Board’s role and the powers which have been delegated to the company’s senior managers and management committees and latest financial information about the group. This is supplemented by meetings with members of the *Group Executive Committee* and other key senior executives, such as the head of the department which manages and advises on BT’s regulatory obligations. Throughout their period in office this information is up-dated as BT’s business, management structure or the regulatory environment in which it operates changes. This can include further meetings with senior BT executives. Directors are also advised on appointment of their legal and other obligations as a director of a listed company, both in writing and, if they wish, through face-to-face meetings with the Company Secretary. They are reminded of these obligations each year.

Procedures exist to ensure directors receive information at least four working days before each Board meeting. Papers must comply with guidelines about content and presentation.

Principal Board committees

The *Group Executive Committee* is chaired by the Chief Executive, Sir Peter Bonfield. The other members are the Group Finance Director, the Group Managing Director

BT UK, the President and Chief Executive Officer BT Global, the heads of BT UK's customer-facing divisions and the network and systems division, the Secretary and Chief Legal Adviser, the Group Personnel Director, the executive responsible for developing the group's strategy and plans and the head of the group's corporate communications team. The Committee develops the group's strategy, for Board approval, and oversees its implementation. It also finalises, before Board approval, annual plans and budgets, reviews operational activities and agrees and monitors group-wide policies, where these are not reserved to the Board.

The *Nominating Committee* of the Chairman, Deputy Chairman and four other non-executive directors ensures the Board has an appropriate balance of expertise and ability among the non-executive directors. For this purpose it has agreed, and regularly reviews, a profile of the required skills and attributes. This profile is used to assess the suitability as non-executive directors of candidates put forward by the directors and outside consultants. Candidates short-listed for appointment are met by the Committee before it recommends an appointment to the Board.

The Committee also assesses candidates for executive directorships before it recommends an appointment.

The *Audit Committee*, consisting solely of non-executive directors, is chaired by Sir Colin Marshall. Its terms of reference include reviewing BT's internal controls and published financial reports for statutory compliance and against standards of best practice, and recommending appropriate disclosure to the Board. It also reviews annually the services and performance of the company's auditors, monitors their non-audit work to ensure that an objective and professional relationship is maintained and recommends to the Board their fees. The Group Finance Director and the Secretary and Chief Legal Adviser attend these meetings. Each year, the Committee sets aside time to seek the views of the company's auditors in the absence of executives.

The *Remuneration Committee* consists solely of independent non-executive directors and is chaired by Sir Colin Marshall. Further details about the Committee are included in the report on directors' remuneration.

Internal financial control

The directors are responsible for the group's systems of internal financial control. Such systems can provide only reasonable and not absolute assurance against material financial misstatement or loss. Key elements are:

- Formal policies and procedures are in place, including the documentation of key systems and rules relating to the delegation of authorities, which allow the monitoring of controls and restrict the unauthorised use of the group's assets.
- Experienced and suitably qualified staff take responsibility for important business functions. Annual appraisal procedures have been established to maintain standards of performance.
- Forecasts and budgets are prepared which allow management to monitor the key business and financial activities and risks and the progress towards financial objectives set for the year and the medium term; monthly management accounts are prepared promptly providing relevant, reliable and up-to-date financial and other information; significant variances from budget are investigated as appropriate.
- All investment projects are subject to formal authorisation procedures. The Board considers major investment projects, with other projects being approved by the *Group Investment Committee* (a sub-committee of the *Group Executive Committee*) or senior management within delegated authorities approved and reviewed by the Board.
- The *Audit Committee* reviews reports from management, from the internal auditors and from the external auditors, to provide reasonable assurance that control procedures are in place and are being followed.
- Formal procedures have been established for instituting appropriate action to correct weaknesses identified from the above reports.

The *Audit Committee* has reviewed the effectiveness of the systems of internal financial control in existence in the group for the year ended 31 March 1998 and for the period up to the date of approval of the financial statements.

Relations with shareholders

Senior executives, led by the Chief Executive and Group Finance Director, hold meetings with the company's

principal institutional shareholders to discuss the company's strategy, financial performance and, as and when necessary, its senior executive remuneration policies and plans. Contact with institutional shareholders (and financial analysts, brokers and the press) is controlled by written guidelines to ensure the protection of share price sensitive information which has not already been made available generally to the company's shareholders.

The company's policy is to give shareholders the opportunity to vote on every substantially different issue by proposing a separate resolution for each issue. The Board's opinion is that the re-election and fees of the auditors are inter-related issues and should therefore be dealt with by one resolution. Changes to the articles of association are being proposed this year. These are being dealt with in a single resolution as changes to the company's constitution are a single issue.

It is our policy for all directors to attend the AGM. Whilst, because of ill health or other pressing reasons, this may not always be achievable, in normal circumstances this means the chairman of the *Audit* and *Remuneration Committees* is at the AGM and is available to answer questions referred to him by the Chairman.

BT's practice is to post the Annual Report and Notice of AGM, given the large number of shareholders, in the most cost-effective manner. We aim to give as much notice as possible and at least 21 days, as required by our articles of association.

Statement of BT Business Practice

BT's policy is to achieve best practice in our standards of business integrity for all of our activities around the world. To reinforce our determination to live up to these standards BT has adopted a *Statement of Business Practice* which sets out the principles the group will observe. A copy is available to every employee. We also require our agents and contractors to apply these principles when representing BT.

Pension fund

BT's main pension fund – the BT Pension Scheme – is not controlled by the Board, but by trustees, who are company and union nominees, with an independent chairman. The trustees look after the assets of the pension fund, which are held separately from those of the company. The pension scheme funds can only be used in accordance with its rules and for no other purpose.

Reporting

A statement by the directors of their responsibilities for preparing the financial statements is included on page 41.

A report to the company by the auditors, Coopers & Lybrand, on corporate governance matters is set out on page 29.

Report on directors' remuneration

As recommended by the Greenbury and Hampel reports, the *Remuneration Committee* is made up wholly of independent non-executive directors. It also complies with Section A of the best practice provisions of the Stock Exchange Listing Rules as they relate to executive directors.

The Committee's role is to agree the service contracts, salaries, other benefits, including bonuses and participation in the company's share plans, and other terms and conditions of employment of the executive directors and members of the company's *Group Executive Committee*. It has been chaired since 1 January 1996 by Sir Colin Marshall and its other members during the year were:

Dr Iain Anderson
Sir Ewen Fergusson
Keith Oates

The Committee met seven times during the year ended 31 March 1998. The Chairman and Chief Executive will normally attend meetings to discuss senior executive remuneration recommendations, except their own.

The Committee confirms that full consideration has been given to Section B of the Stock Exchange best practice provisions in framing its remuneration policy. Although the full Board considers itself ultimately responsible for both the framework and the cost of executive remuneration, the Board has delegated prime responsibility for these issues, together with control of executive remuneration packages, to the *Remuneration Committee*.

Remuneration policy

BT's executive remuneration policy is in line with the company's overall practice on pay and benefits, that is to reward employees competitively taking into account performance, market value and competitive pressures in the communications and IT sectors. The Committee does not seek to maintain any strict market position but rather to ensure that pay is set appropriately taking into account pay levels for comparable roles in a range of appropriate 'blue chip' companies both within and outside the telecommunications/hi-tech sectors. When making comparisons, the Committee benchmarks not only with companies in the telecommunications and IT sectors but also the largest companies by market capitalisation, such as the FT-SE 100 and, in particular, those organisations where the complexity of roles and of the business and the extent of international scope are similar. The Committee also

takes account of executive pay trends in the external market and increases in pay for other groups of employees in the company. As BT continues to compete in a global market for executives at this level, the Committee also looks at the global, and particularly, US markets.

Packages

The remuneration package for executive directors comprises:

- **Basic salary**

Salaries are reviewed (although not necessarily increased) annually. Salaries are increased only where the Committee believes that market adjustments are appropriate to reflect performance, increased responsibilities and/or market pressures. Salary adjustments were made during the year for a number of key executives, including Sir Peter Bonfield and Robert Brace. From 1 April 1998, fifteen months after their last increase, Sir Peter Bonfield's salary was increased from £570,000 to £617,500 and Robert Brace's salary increased from £300,000 to £330,000. Bill Cockburn was appointed to the Board on 1 April 1998. His salary is £450,000. However, for the 12 months from 1 March 1998 it has, at his request, been reduced by £120,000 to £330,000. The company will during that period make contributions of £120,000 to an unapproved retirement benefits scheme transferred from Bill Cockburn's previous employer. His bonus and other relevant benefits will continue to be determined on his base salary. Bill Cockburn received a payment of £120,150 in consideration of the loss of potential benefits from his previous employer.

- **Annual bonus**

The annual bonus plan is designed to focus on annual objectives and to reward senior executives appropriately for the results achieved against these objectives. Targets are set at the start of the financial year based on key corporate objectives – such as revenue growth, profitability, quality of service, customer satisfaction and people management. Specific weights are attached to each objective on the basis of the BT Corporate Scorecard. For Sir Peter Bonfield, bonus awards are based wholly, and for Sir Iain Vallance, primarily, on the achievement of group-wide objectives and results. Bill Cockburn's bonus to 31 March 1998 was also calculated on the achievement of group-wide objectives and results. From 1 April 1998, his bonus, in common

with Robert Brace and the other members of the *Group Executive Committee*, will be based on the achievement of a mix of group, divisional and personal objectives. The Committee retains the flexibility to enhance bonus awards where exceptional circumstances make this appropriate.

For Sir Iain Vallance and Sir Peter Bonfield, for 1997/98, the 'on target' bonus was 50% of salary subject to a maximum of 100% of salary. As explained in the *Chairman's statement*, Sir Iain takes up a part-time role later in the year. From that time he will not participate in any annual bonus plan.

Robert Brace's 'on target' bonus for the year was 32.5%, subject exceptionally to a maximum of 100% of salary for this year only. Bill Cockburn's bonus arrangements provide for an 'on target' bonus of 50% of salary subject to a maximum of 75%.

Bonus awards for executive directors for the year under review ranged from 41% to 65% of salary.

- **Long-term remuneration**
**BT Long Term Remuneration Plan/
BT Performance Share Plan**

The BT Long Term Remuneration Plan ('LTRP') was approved by shareholders at the 1995 AGM. It was designed to ensure that BT's remuneration package remains competitive, to encourage personal investment in BT shares, to foster community of interest with shareholders, to encourage key executives to stay with BT and to link reward and long-term corporate performance more effectively. Under the plan, shares are awarded to participants conditionally on the company meeting a pre-determined corporate performance measure and, normally, the participants still being employed by the BT Group at the end of a five-year period. The performance measure is BT's total shareholder return ('TSR') relative to the FT-SE 100. The initial value of the awards granted under the LTRP in 1997 as a percentage of salary ranged from 25% to 100%. Sir Iain Vallance has not participated in the LTRP.

As Bill Cockburn joined the company too late in the year to participate in the 1997 operation of the LTRP, he has been granted an award of shares under the BT Performance Share Plan ('PSP') to the value

of £150,000 at the date of the award.

Under the PSP, approved by shareholders at the 1995 AGM, shares are conditionally awarded to participants on the basis that they will only be entitled to these shares in full at the end of a three-year period (which may be extended up to five years) if the company has met a pre-determined corporate performance measure and the participants are still employed by the BT Group. The performance measure is the same as for the LTRP. The first potential vesting of awards under the PSP will be in 1998/99.

The future

The Remuneration Committee keeps under review remuneration arrangements to ensure that they provide an incentive to executives and align performance and reward with the interests of shareholders.

The Committee's policy is over time to increase the proportion of executives' overall remuneration packages which is performance-linked variable pay.

In furtherance of this policy, and to ensure BT's packages remain competitive, a Deferred Bonus Plan has been introduced. The deferred bonus will equal one-half of the gross annual bonus. It will be compulsorily deferred and applied to acquire BT shares, which will be held in trust for three years. Executives must continue to be employed for the whole of the holding period for the shares to be then transferred. Therefore, in addition to bonuses continuing to be based fully on performance, the value of the deferred bonus will now be aligned with the future fortunes of shareholders. Existing shares will be used for the deferred bonuses and the first deferred award will occur this year.

To increase the linkage with longer-term performance, the LTRP has been modified, and will now be called the Executive Share Plan. In previous years, part of the award was performance-linked only on grant and not also on vesting. This year and in the future all the awards will be subject to performance criteria over a five-year period, which will continue to be TSR. The level of the awards granted will continue to be based on the individual performance of the executives during the preceding year thereby ensuring that both the grant and vesting of awards will be performance-linked. Awards will be between 20% and 100% of salary and

will not exceed the level possible under the previous LTRP arrangement. From and including this year, the optional personal investment and the associated matching grant under the plan will no longer be made available.

To improve the alignment of performance with BT's business cycle, the performance period will now run from 1 April to 31 March in line with the company's financial year, and not from 1 August as in previous years. However, awards will continue to vest on 1 August.

BT Share Option Scheme

The BT Share Option Scheme for senior executives was not renewed after its expiry in January 1995. The last options were granted in December 1994.

Details of options exercised during the year ended 31 March 1998 and unexercised options are shown on page 39.

• Pensions

For executive directors and other senior executives the policy is to provide pension benefits of one thirtieth of final salary for each year of service with a two-thirds surviving spouse's pension. The executive directors and certain other senior executives have undertakings of pension benefits of two-thirds of final salary at normal retirement age with a two-thirds surviving spouse's pension. On death in service a lump sum equal to four times annual salary is payable together with a surviving

spouse's pension of two-thirds of the director's prospective pension. Pensions are based on salary alone – bonuses, other benefits and long-term incentives are excluded.

The primary means of providing pensions for the executive directors and their dependants is through the BT Pension Scheme (BTPS). All the executive directors, except Sir Peter Bonfield, are members of the BTPS. For members of the BTPS the company contributed, on average, 9.5% of salary to the scheme and the individual contributed 6% of salary in the year ended 31 March 1998.

Where an individual will not achieve the target level of pension benefit at normal retirement age because of the earnings cap, the company may make up the shortfall by purchasing additional service in the BTPS and/or through non-approved, unfunded arrangements.

On his retirement as full-time chairman on 31 July 1998 Sir Iain Vallance will be entitled to receive retirement benefits equivalent to two-thirds of his final salary. His surviving spouse's pension is two-thirds of his pension.

Sir Peter Bonfield's pension arrangements are unapproved and unfunded and provide for a pension of two-thirds of his final salary at age 60, inclusive of any retained benefits from his previous employment, and a surviving spouse's pension of two-thirds of his pension. He is entitled to a pension of 52% of salary at age 55. If retirement occurs between age 55 and 60, the percentage of salary to calculate the pension will

	Increase in accrued pension during year or to date of retirement in year (a)		Total accrued pension at year end or at date of retirement, if earlier (b)		Transfer value of increase in accrued benefit (c)	
	1998 £000	1997 £000	1998 £000	1997 £000	1998 £000	1997 £000
Sir Iain Vallance	9	9	332	312	159	98
Sir Peter Bonfield	18	18	41	22	276	184
R P Brace (d)	14	17	98	81	173	129
A W Rudge	10	24	193	179	92	297

(a) The increase in accrued pension during the year excludes any increase for inflation.

(b) The pension entitlement is that which would be paid annually on retirement at normal retirement age based on service to the end of the year or date of retirement if earlier.

(c) The transfer value has been calculated on the basis of actuarial advice in accordance with Actuarial Guidance Note GN11 and excludes directors' contributions. The transfer value represents a liability of the company rather than any remuneration due to the individual and cannot be meaningfully aggregated with annual remuneration as it is not money the individual is entitled to receive.

(d) Comparative figures have been restated on a comparable basis.

increase on a uniform basis from 52% at age 55 to two-thirds at age 60. Bill Cockburn is a member of the BTPS and has an unfunded and unapproved arrangement to meet the shortfall resulting from the pensions cap. In addition he has a funded unapproved retirement benefits scheme transferred from his previous employer to which the company is making contributions of £120,000 over the 12 months from 1 March 1998. Mr Cockburn's salary has been reduced, at his request, by £120,000 during this period.

The table on page 35 shows the increase in the accrued benefits to which each director has become entitled during the year and the transfer value of the increase in accrued benefit.

- **Other benefits**

Other benefits include car and driver, personal telecommunications facilities, medical cover for the director and immediate family and financial counselling. In addition to his company car, Sir Iain Vallance has the use of a pool car in Scotland for occasional private use and pays tax accordingly.

Service agreements

It is the company's policy that all the executive directors have service agreements for a period of one year, that they contain provisions for the removal of a director through poor performance and deal with payments to which the director would be entitled if he was removed from office, except for misconduct. The initial three-year term of Sir Peter Bonfield's contract was last year extended, as part of the preparations for the merger with MCI, to 31 December 1999 after which time it can be terminated by either party giving twelve months' notice. Bill Cockburn has an initial two-year contract effective from 1 October 1997 which can be terminated at any time after 30 September 1999 by either party giving 12 months' notice. Sir Iain Vallance's and Robert Brace's contracts can be terminated by the director or BT giving 12 months' notice.

Outside appointments

The Committee believes there are significant benefits to both the company and the individual from executive directors accepting non-executive directorships of companies outside the BT Group. The Committee will consider approving up to two external appointments for which the director may retain the fees.

Non-executive directors' remuneration

The Board has delegated the determination of remuneration for non-executive directors to the Chairman and Chief Executive. They seek external advice on appropriate levels of remuneration. Section A of the best practice provisions of the Stock Exchange Listing Rules says that non-executives' remuneration should be determined by the Board. As the intention is that two-thirds of the BT Board are non-executives who could not vote on their own remuneration, the Board does not consider it appropriate for the whole Board to undertake this role.

The basic fee for non-executive directors, which includes membership of one committee, is £25,000 per year. Additional fees for membership of most other Board committees range from £3,000 to £5,000 per year. Committee chairmen receive an additional fee of £2,000 a year for each committee they chair. Sir Colin Marshall received an inclusive fee of £65,000 last year as Deputy Chairman which increased to £75,000 with effect from 1 April 1998.

Directors' remuneration

The remuneration (excluding pension arrangements) of the directors was as follows:

	Salary and fees		Annual bonus		Deferred bonus		Benefits excluding pension (a)		Total	
	1998 £000	1997 £000	1998 £000	1997 £000	1998 £000	1997 £000	1998 £000	1997 £000	1998 £000	1997 £000
Sir Iain Vallance	500	485	325	185	-	-	37	32	862	702
Sir Peter Bonfield	570	499	325	225	163(c)	-	43	30	1,101	754
R P Brace	300	273	162	110	59(c)	-	23	17	544	400
A W Rudge	208	286	70	116	-	-	11	15	289	417
Sir Colin Marshall	65	65	-	-	-	-	-	-	65	65
J I W Anderson	38(b)	31(b)	-	-	-	-	-	-	38	31
M Argent	52	46	-	-	-	-	1	1	53	47
Sir Ewen Fergusson	38	33	-	-	-	-	-	-	38	33
J K Oates	35	30	-	-	-	-	-	-	35	30
B E Breuel	22	20	-	-	-	-	-	-	22	20
Y M Newbold	8	29	-	-	-	-	-	-	8	29
B C Roberts	-	-	-	-	-	-	-	-	-	-
G H Taylor	-	-	-	-	-	-	-	-	-	-
Rt Hon Lord Tebbit	-	18	-	-	-	-	-	-	-	18
Total remuneration	1,836	1,815	882	636	222	-	115	95	3,055	2,546

(a) Includes such benefits as described on page 36. 1997 figures have been restated.

(b) Payments to non-executive directors include fees paid to their principal employer of £38,000 (1997 – £30,996).

(c) This amount has been awarded, by way of a deferred bonus, for the year ended 31 March 1998. This award will be applied in buying BT shares with a market value no greater than the amount of the award. The executive will receive those shares after three years only if he is still employed by the company.

The directors' long-term remuneration benefits, through the exercise of share options, were as follows:

	1998 £000	1997 £000
Sir Iain Vallance	415	3
R P Brace	-	6
A W Rudge	442	-
M Argent	-	84

The figures in the above table are based on the amount by which the market value of the shares on the date of exercise exceeded the option price. The figures for 1998 include the employee compensation for the special dividend (see note 3 to the financial statements).

Under the terms for his leaving the company, Michael Hepher continued to receive his salary and contractual benefits until his service contract expired on 5 August 1997. The total salary payable during the year ended 31 March 1998 was £149,113 and he received other benefits of £2,401. In the prior year, he received salary of £430,000 and £80,000 in lieu of benefits. Other benefits for the year ended 31 March 1997 were £14,239.

Yve Newbold retired on 30 June 1997, Dr Alan Rudge on 31 October 1997, Gerald Taylor on 9 November 1997, Bert Roberts on 17 March 1998 and Birgit Breuel on 31 March 1998. Gerald Taylor agreed to waive fees of £13,383 (1997 – £8,587) for the year ended 31 March 1998. In the previous financial year, Gerald Taylor joined the Board on 4 November 1996 and Lord Tebbit retired on 2 November 1996. Sir Michael Bett, who retired on 31 January 1996, remains chairman of Cellnet Group Limited, a subsidiary company for which he received fees of £15,000 (1997 – £15,000) during the year ended 31 March 1998. Yve Newbold remains on the Community Affairs Committee for which she received fees of £3,750 after her retirement.

Directors' interests

The interests of directors and their families in the company's shares at 31 March 1998 and 1 April 1997 are shown below:

Beneficial holdings	1998	1997
Sir Iain Vallance	208,366	185,756
Sir Peter Bonfield	9,228^(a)	8,305 ^(a)
R P Brace	30,103^(a)	20,231 ^(a)
Sir Colin Marshall	2,000	2,000
J I W Anderson	4,155	–
M Argent	17,988	17,988
B E Breuel	–	–
Sir Ewen Fergusson	–	–
J K Oates	3,810	3,764

(a) Includes 9,094 shares (1997 – 8,305 shares) purchased and held by Sir Peter Bonfield and 21,841 shares (1997 – 16,710 shares) by Robert Brace in the Long Term Remuneration Plan (see note 28 to the financial statements).

Details of share options held at 1 April 1997, granted and exercised under the share option schemes during the year, and the balance held at 31 March 1998 are as follows:

	Number of shares under option			Option exercise price per share	Market price at date of exercise	Usual date from which exercisable	Usual expiry date	
	1 April 1997	Granted	Exercised					31 March 1998
Sir Iain Vallance	55,189	–	55,189 ^(b)	–	264p	502p	07/09/92	07/09/99

	178,555	–	162,901	15,654				

(a) All of the above options were granted for nil consideration.

(b) Options exercised under the BT Share Option Scheme on 9 January 1998.

(c) Dr Rudge retired as a director of the company on 31 October 1997.

(d) Options exercised under the BT Share Option Scheme on 14 January 1998.

(e) Options exercised under the BT Employee Sharesave Scheme, in which all employees of the company are eligible to participate, on 16 June 1997.

Unrealised gains on the above share options at 31 March 1998, based on the market price of the shares at that date, excluding the employee compensation for the special dividend which is discretionary in respect of directors' share options, were as follows:

	Options exercisable			Options not exercisable		
	Number of shares	Unrealised gains		Number of shares	Unrealised gains	
		1998 £000	1997(a) £000		1998 £000	1997(a) £000
Sir Iain Vallance	82,487	240	325	-	-	3
Sir Peter Bonfield	-	-	-	6,460	25	12
R P Brace	252,130	831	303	6,141	22	26
A W Rudge	15,564	39	252	-	-	10

(a) Based on options outstanding at 31 March 1997 and the market price of the shares at that date.

The market price of the shares at 31 March 1998 was 650p (1997 – 445.5p) and the range during the year ended 31 March 1998 was 379.5p to 685p.

Details of the company's ordinary shares provisionally awarded to directors, as participants under the Long Term Remuneration Plan (note 28 to the financial statements), were as follows:

	Total number of award shares(a)			Range of value of award(b)		
	1 April 1997	Awarded	Dividends reinvested	31 March 1998	Minimum £000	Maximum £000
Sir Peter Bonfield	125,137	98,100	17,183	240,420	314	1,563
R P Brace	169,161	65,400	22,348	256,909	301	1,670
A W Rudge	110,045	-	13,983	124,028	161	806

(a) Excluding shares purchased by each director under the plan (see page 38).

(b) Based on the market value of the company's shares at 31 March 1998. The minimum figure represents those shares held at 31 March 1998 which will transfer to each director at the end of year five of the plan (1999 to 2002). The maximum figure represents all shares held at 31 March 1998 which will transfer to each director at the end of year five of the plan (1999 to 2002) provided the corporate performance measure has been fully met. Normally shares will transfer only if the individual is still employed by the group. However, the plan gives discretion to preserve awards of shares after retirement. Under this discretion, Dr Rudge's awards have been preserved until the end of year five of the plan.

At 31 March 1998, Sir Iain Vallance, Sir Peter Bonfield and Robert Brace each had a non-beneficial interest in 21,919 shares (1997 – 62,891) purchased by BT Employee Shares Trustees Limited for allocation to employees under the BT Employee Share Ownership Scheme, and 10,467,987 shares (1997 – 6,206,481) held in trust by Ilford Trustees (Jersey) Limited for allocation to participating employees under the Long Term Remuneration Plan and the Performance Share Plan.

No director had any interest in the debentures of the company or in the share capital or debentures of its subsidiaries.

On appointment to the Board on 1 April 1998, Bill Cockburn had a beneficial interest of 4,181 shares in the company. During the year ended 31 March 1998, he was awarded 32,520 shares under the Performance Share Plan (note 28 to the financial statements). He will only be entitled to these shares in full at the end of a period ending on 31 July 1998 (which may be extended for a further two years), if the company has met a pre-determined corporate performance measure and he is still employed by the BT group.

There have been no other changes in the directors' interests in the share capital or in the debentures of the company and its subsidiaries between 31 March 1998 and 26 May 1998.

Sir Colin Marshall

Deputy Chairman and Chairman of Remuneration Committee

26 MAY 1998

Statement of directors' responsibility

FOR PREPARING THE FINANCIAL STATEMENTS

The directors are required by law to prepare financial statements for each financial year which give a true and fair view of the state of affairs of the company and the group as at the end of the financial year and of the profit or loss, total recognised gains or losses and cash flows of the group for that period.

The directors consider that, in preparing the financial statements for the year ended 31 March 1998 on pages 45 to 79, the company has used appropriate accounting policies, consistently applied and supported by reasonable and prudent judgements and estimates. The directors also consider that all applicable accounting standards have been followed and confirm that the financial statements have been prepared on the going concern basis.

The directors are responsible for ensuring that the company keeps accounting records which disclose with reasonable accuracy at any time the financial position of the company and which enable them to ensure that the financial statements comply with the Companies Act 1985.

The directors are also responsible for taking such steps that are reasonably open to them to safeguard the assets of the group and to prevent and detect fraud and other irregularities.

The auditors' responsibilities are stated in their report to the shareholders.

Report of the auditors

TO THE SHAREHOLDERS OF BRITISH TELECOMMUNICATIONS plc

We have audited the financial statements on page 45 to 79. We have also examined the amounts disclosed relating to the directors' remuneration, share options and pension entitlements on pages 35 to 40.

Respective responsibilities of directors and auditors

As described in the statement of directors' responsibility, the company's directors are responsible for the preparation of financial statements. It is our responsibility to form an independent opinion, based on our audit, on those financial statements and to report our opinion to you.

Basis of opinion

We conducted our audit in accordance with United Kingdom Auditing Standards issued by the Auditing Practices Board which are substantially the same as auditing standards generally accepted in the United States. An audit includes examination, on a test basis, of evidence relevant to the amounts and disclosures in the financial statements. It also includes an assessment of the significant estimates and judgements made by the directors in the preparation of the financial statements, and of whether the accounting policies are appropriate to the company's circumstances, consistently applied and adequately disclosed.

We planned and performed our audit so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or other irregularity or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the financial statements.

Opinion

In our opinion the financial statements referred to above:

- give a true and fair view of the state of affairs of the company and the group at 31 March 1998 and of the profit, total recognised gains and cash flows of the group for the year then ended and have been properly prepared in accordance with the Companies Act 1985.
- present fairly, in all material respects, the consolidated financial position of the group as at 31 March 1998 and 31 March 1997 and the results of their operations, total recognised gains and their cash flows for the years ended 31 March 1998, 31 March 1997 and 31 March 1996 in conformity with accounting principles generally accepted in the United Kingdom. The principles differ in certain respects from accounting principles generally accepted in the United States. The effect of the differences in the determination of net income, shareholders' equity and cash flows is shown in note 30 to the financial statements.

Accounting policies

I Basis of preparation of the financial statements

The financial statements are prepared under the historical cost convention and in accordance with applicable accounting standards. The group financial statements consolidate those of the company and all of its subsidiary undertakings. Where the financial statements of subsidiary and associated undertakings do not conform with the group's accounting policies, appropriate adjustments are made on consolidation in order to present the group financial statements on a consistent basis. The principal subsidiary undertakings' financial years are all coterminous with those of the company.

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenditure during the reporting period. Actual results could differ from those estimates. Estimates are used principally when accounting for income, provision for doubtful debts, payments to telecommunication operators, depreciation, employee pension schemes and taxes. Certain comparative figures have been restated to conform with revised presentation and reclassification of figures in the year ended 31 March 1998.

II Turnover

Turnover, which excludes value added tax and other sales taxes, comprises the value of services provided and equipment sales excluding those between group undertakings.

III Research and development

Expenditure on research and development is written off as incurred.

IV Interest

Interest payable, including that related to financing the construction of tangible fixed assets, is written off as incurred. Discounts or premiums and expenses on the issue of debt securities are amortised over the term of the related security and included within interest payable. Premiums payable on early redemptions of debt securities, in lieu of future interest costs, are written off when paid.

V Foreign currencies

On consolidation, assets and liabilities of foreign undertakings are translated into sterling at year-end exchange rates. The results of foreign undertakings are translated into sterling at average rates of exchange for the year.

Exchange differences arising from the retranslation at year-end exchange rates of the net investment in foreign

undertakings, less exchange differences on borrowings which finance or provide a hedge against those undertakings, are taken to reserves and are reported in the statement of total recognised gains and losses.

All other exchange gains or losses are dealt with through the profit and loss account.

VI Goodwill

Goodwill, arising from the purchase of subsidiary and associated undertakings, representing the excess of the fair value of the purchase consideration over the fair value of the net assets acquired, is written off on acquisition against group reserves. If an undertaking is subsequently divested, or if there has been a permanent diminution in value, the appropriate goodwill is dealt with through the profit and loss account in the period of disposal as part of the calculation of gain or loss on divestment or in the period of permanent diminution.

VII Tangible fixed assets

Tangible fixed assets are stated at historical cost less depreciation.

(a) Cost

Cost in the case of network services comprises expenditure up to and including the last distribution point and includes contractors' charges and payments on account, materials, direct labour and related overheads.

(b) Depreciation

Depreciation is provided on tangible fixed assets on a straight line basis from the time they are available for use, so as to write off their costs over their estimated useful lives taking into account any expected residual values. No depreciation is provided on freehold land.

The lives assigned to other significant tangible fixed assets are:

Freehold buildings –	40 years
Leasehold land and buildings –	Unexpired portion of lease or 40 years, whichever is the shorter
Transmission equipment:	
duct –	25 years
cable –	3 to 25 years
radio and repeater equipment –	2 to 25 years
Digital telephone exchange equipment –	2 to 13 years
Computers and office equipment –	2 to 7 years
Payphones, other network equipment, motor vehicles and cables	3 to 20 years

VIII Fixed asset investments

Investments in subsidiary and associated undertakings are stated in the balance sheet of the company at cost less amounts written off. Amounts denominated in foreign currency are translated into sterling at year-end exchange rates.

Investments in associated undertakings are stated in the group balance sheet at the group's share of their net assets.

The group's share of profits less losses of associated undertakings is included in the group profit and loss account.

Investments in other participating interests and other investments are stated at cost less amounts written off.

IX Stocks

Stocks mainly comprise items of equipment, held for sale or rental, consumable items and work in progress on long-term contracts.

Equipment held and consumable items are stated at the lower of cost and estimated net realisable value, after provisions for obsolescence.

Work in progress on long-term contracts is stated at cost, after deducting payments on account, less provisions for any foreseeable losses.

X Redundancy costs

Redundancy costs arising from periodic reviews of staff levels are charged against profit in the year in which employees leave the group.

If the most recent actuarial valuation of the group's pension scheme shows a deficit, the estimated cost of providing incremental pension benefits in respect of employees leaving the group is charged against profit in the year in which the employees leave the group, within redundancy charges.

XI Pension scheme

The group operates a defined benefit pension scheme, which is independent of the group's finances, for the substantial majority of its employees. Actuarial valuations of the scheme are carried out as determined by the trustees at intervals of not more than three years, the rates of contribution payable and the pension cost being determined on the advice of the actuaries, having regard to the results of these valuations. In any intervening years, the actuaries review the continuing appropriateness of the contribution rates.

The cost of providing pensions is charged against profits over employees' working lives with the group using the projected unit method. Variations from this regular cost are allocated over the average remaining service lives of current employees to the extent that these variations do not relate to the estimated cost of providing incremental pension benefits in the circumstances described in X above.

Interest is accounted for on the provision in the balance sheet which results from differences between amounts recognised as pension costs and amounts funded. The regular pension cost, variations from the regular pension cost, described above, and interest are all charged within staff costs.

XII Taxation

The charge for taxation is based on the profit for the year and takes into account deferred taxation. Provision is made for deferred taxation only to the extent that timing differences are expected to reverse in the foreseeable future, with the exception of timing differences arising on pension costs where full provision is made irrespective of whether they are expected to reverse in the foreseeable future.

XIII Financial instruments**(a) Debt instruments**

Debt instruments are stated at the amount of net proceeds adjusted to amortise any discount evenly over the term of the debt.

(b) Derivative financial instruments

The group uses derivative financial instruments to reduce exposure to foreign exchange risks and interest rate movements. The group does not hold or issue derivative financial instruments for financial trading purposes.

Criteria to qualify for hedge accounting

The group considers its derivative financial instruments to be hedges when certain criteria are met. For foreign currency derivatives, the instrument must be related to actual foreign currency assets or liabilities or a probable commitment and whose characteristics have been identified. It must involve the same currency or similar currencies as the hedged item and must also reduce the risk of foreign currency exchange movements on the group's operations. For interest rate derivatives, the instrument must be related to assets or liabilities or a probable commitment and must also change the nature of the interest rate by converting a fixed rate to a variable rate or vice versa.

(b) Derivative financial instruments (continued)*Accounting for derivative financial instruments*

Principal amounts underlying currency swaps are revalued at exchange rates ruling at the date of the group balance sheet and are included in debtors or creditors.

Interest differentials, under interest rate swap agreements used to vary the amounts and periods for which interest rates on borrowings are fixed, are recognised by adjustment of interest payable.

The forward exchange contracts used to change the currency mix of net debt are revalued to balance sheet rates with net unrealised gains and losses being shown as part of debtors or creditors. The difference between spot and forward rate for these contracts is recognised as part of net interest payable over the term of the contract.

The forward exchange contracts hedging transaction exposures are revalued at the prevailing forward rate on the balance sheet date with net unrealised gains and losses being shown as debtors and creditors.

Debtors include amounts receivable after more than one year: group £97m (1997 – £546m) and company £213m (1997 – £741m).

The financial statements on pages 45 to 79 were approved by the board of directors on 26 May 1998 and were signed on its behalf by

Sir Iain Vallance *Chairman*

Sir Peter Bonfield CBE *Chief Executive*

R P Brace *Group Finance Director*

Notes to the financial statements

1. Turnover	1998 £m	1997 £m	1996 £m
Inland calls	4,924	4,874	4,882
International calls	1,553	1,809	1,980
Exchange line rentals	2,957	2,811	2,685
Private circuits	1,149	1,124	1,056
Mobile communications	1,089	949	856
Customer premises equipment supply	896	914	946
Yellow Pages and other directories	466	438	408
Other sales and services	2,606	2,016	1,633
Total turnover	15,640	14,935	14,446

The group provides telecommunication services, principally in the United Kingdom, essentially operating as a unitary business. Its main services and products are local and national telephone calls in the United Kingdom, the provision of telephone exchange lines to homes and businesses, international telephone calls made to and from the United Kingdom, the provision of private circuits to businesses, the supply of mobile communication services and equipment to businesses and individuals and the supply of telecommunication equipment for customers' premises.

Turnover included income from UK and overseas telecommunications operators of £1,269m (1997 – £1,165m, 1996 – £1,166m). Approximately 4% (1997 – 3%, 1996 – 2%) of total operating revenues arose from operations outside the United Kingdom. There were no discontinued operations or acquisitions in the years ended 31 March 1996, 1997 and 1998 that require disclosure under Financial Reporting Standard 3.

Unaudited information concerning the group's classified directory business in the UK is shown on page 83 of this annual report.

2. Other operating income	1998 £m	1997 £m	1996 £m
Merger agreement break up fee (a)	273	–	–
Merger expenses written off	(35)	–	–
Other	134	106	103
Total other operating income	372	106	103

(a) The company received US\$465 million on 12 November 1997 from WorldCom, Inc as a break up fee and partial reimbursement of expenses ("the MCI merger break up fee") following the termination of the BT/MCI merger agreement on 9 November 1997 (note 15 (b)).

	1998	1997	1996
	£m	£m	£m
3. Operating costs			
Staff costs:			
Wages and salaries	3,290	3,161	3,105
Social security costs	266	262	261
Pension costs (<i>note 25</i>)	177	291	284
Employee share ownership scheme (<i>a</i>)	64	64	30
Employee share option scheme compensation for special dividend (<i>b</i>)	120	–	–
Total staff costs	3,917	3,778	3,680
Own work capitalised	(424)	(399)	(417)
Depreciation (<i>note 14</i>)	2,395	2,265	2,189
Payments to telecommunication operators	1,600	1,476	1,383
Redundancy charges (<i>c</i>)	106	367	421
Other operating costs	4,761	4,309	4,193
Total operating costs	12,355	11,796	11,449
Operating costs included the following:			
Research and development	307	291	282
Rental costs relating to operating leases, including plant and equipment hire £19m (1997 – £10m, 1996 – £23m)	192	215	250

(a) Amount set aside for the year for allocation of ordinary shares in the company to eligible employees.

(b) Compensation for employees holding share options on 15 August 1997 in respect of the September 1997 special dividend.

(c) Redundancy charges for the year ended 31 March 1997 included £258m (1996 – £266m) being the cost of providing incremental pension benefits for employees taking early retirement. No charge for these pension benefits was made in the year ended 31 March 1998 in view of the surplus in the BT pension scheme disclosed by the most recent actuarial valuation as at 31 December 1996; the previous valuation had shown a deficit.

The directors believe that the nature of the group's business is such that the analysis of operating costs required by the Companies Act 1985 is not appropriate. As required by the Act, the directors have therefore adapted the prescribed format so that operating costs are disclosed in a manner appropriate to the group's principal activity. Other operating income, previously presented within operating costs, is now shown separately on the face of the group profit and loss account because of its greater materiality in the year ended 31 March 1998.

4. Profit on sale of group undertakings

In the years ended 31 March 1998, 31 March 1997 and 31 March 1996 the subsidiary undertakings disposed of had a negligible effect on the group's operating profit and cash flows and their net assets were immaterial to the group's financial position.

	1998	1997	1996
	£m	£m	£m
5. Interest receivable			
Income from listed investments	11	12	29
Other interest receivable	154	194	172
Total interest receivable	165	206	201

6. Interest payable	1998	1997	1996
	£m	£m	£m
Interest payable and similar charges in respect of:			
Bank loans and overdrafts	80	76	74
Other borrowings	334	259	297
Total interest payable	414	335	371

7. Premium on repurchase of bonds

In August 1996, the company repurchased two of the three series of HM Government held bonds then outstanding for £422m at an effective premium of £60m. The final bond series with a face value of £140m was repaid on maturity on 31 March 1997.

8. Tax on profit on ordinary activities	1998	1997	1996
	£m	£m	£m
United Kingdom:			
Corporation tax at 31% (1997 – 33%, 1996 – 33%)	985	1,135	1,000
Deferred taxation charge (credit) at 30% (1997 – 33%, 1996 – 33%)	17	(100)	(20)
Taxation on the group's share of results of associated undertakings	1	–	1
Deferred taxation provision released due to reduction in corporation tax rate	(25)	–	–
Prior year adjustments	(2)	1	(1)
Total UK taxation, excluding windfall tax	976	1,036	980
Overseas taxation:			
Current	6	17	8
Taxation charge (credit) on the group's share of results of associated undertakings	(4)	49	39
Total corporation and similar taxes	978	1,102	1,027
Windfall tax	510	–	–
Total tax on profit on ordinary activities	1,488	1,102	1,027

The company's charge to the UK windfall tax, imposed on certain privatised companies on 2 July 1997, is payable in two equal instalments, the first of which was paid on 2 December 1997. The second instalment is payable on 1 December 1998. The charge is based on the group's profit for the financial years ended 31 March 1986 to 31 March 1989.

Total tax on profit on ordinary activities, excluding the windfall tax, varied from the amount computed by applying the corporation tax rate to profit on ordinary activities before taxation. The differences were attributable to the following factors:

	1998	1997	1996
	%	%	%
UK corporation tax rate	31.0	33.0	33.0
Non-deductible depreciation	0.6	0.8	1.3
Non-deductible overseas losses	1.1	1.0	0.9
Unprovided deferred taxes on excess capital allowances	(0.9)	(0.9)	(1.0)
Effect of reduction in UK corporation tax rate on deferred tax provision	(0.8)	–	–
Lower effective tax on MCI merger break up fee	(0.7)	–	–
Non-deductible premium on bonds repurchased from HM Government	–	0.4	–
Other	0.1	0.1	(0.2)
Effective corporation tax rate	30.4	34.4	34.0

Deferred taxation of £30m (1997 – £28m, 1996 – £30m) arising on excess capital allowances and £nil (1997 – £19m, 1996 – £11m) on profits of associated undertakings was not provided in the year ended 31 March 1998.

8. Tax on profit on ordinary activities (continued)

The deferred taxation charge (credit) was mainly the result of the tax effect of timing differences as follows:

	1998 £m	1997 £m	1996 £m
Excess capital allowances	24	62	76
Pension provisions	20	(103)	(29)
Other timing differences	(27)	(59)	(67)
	17	(100)	(20)
Release due to reduction in corporation tax rate	(25)	–	–
Prior year adjustments (a)	(14)	21	116
Total deferred taxation charge (credit)	(22)	(79)	96

(a) Reclassification between deferred and current taxation on the profit on ordinary activities for prior years.

9. Dividends	1998	1997	1996	1998	1997	1996
	pence per share	pence per share	pence per share			
Interim dividend paid	7.55	7.90	7.45	483	502	469
Proposed final dividend	11.45	11.95	11.25	737	764	715
Total ordinary dividends	19.00	19.85	18.70	1,220	1,266	1,184
Special dividend	–	35.00	–	–	2,244	–
Total dividends	19.00	54.85	18.70	1,220	3,510	1,184

10. Earnings per share

Earnings per share are calculated by dividing the profit for the financial year ended 31 March 1998, amounting to £1,706m (1997 – £2,077m, 1996 – £1,986m), by 6,394 million shares, the weighted average number of shares in issue during the financial year (1997 – 6,336 million, 1996 – 6,283 million). The fully diluted earnings per share are based on share options outstanding.

The exceptional items in the calculation of the earnings per share before exceptional items in the year ended 31 March 1998 and the individual earnings per share effects are:

	Pence per share	£m
MCI merger break up fee received less expenses		238
Less tax charge attributable to the MCI merger break up fee		(50)
Net merger break up fee after tax	3.0	188
Windfall tax charge	(8.0)	(510)
Net charge	(5.0)	(322)

11. Reconciliation of operating profit to operating cash flows

	1998 £m	1997 £m	1996 £m
Operating profit, including share of results of associated undertakings	3,405	3,384	3,182
Depreciation	2,395	2,265	2,189
Share of losses (profits) of associated undertakings net of dividends received £5m (1997 – £7m, 1996 – £5m)	257	(132)	(77)
Decrease in stocks	36	31	36
Increase in debtors	(29)	(168)	(335)
Increase in creditors	44	478	493
Increase (decrease) in provisions	(47)	321	309
Other	15	13	37
Net cash inflow from operating activities	6,076	6,192	5,834

12. Management of liquid resources	1998 £m	1997 £m	1996 £m
Purchase of short-term investments and payments into short-term deposits over 3 months	(1,103)	(2,242)	(2,520)
Sale of short-term investments and withdrawals from short-term deposits over 3 months	1,334	2,790	1,996
Net movement of short-term investments and short-term deposits under 3 months not repayable on demand	2,016	(1,052)	(793)
Net cash inflow (outflow) from management of liquid resources	2,247	(504)	(1,317)

Movements in all short-term investments and deposits not repayable on demand are reported under the heading of management of liquid resources.

13. Net debt	At 1 April 1997 £m	Cash flow £m	Other non-cash changes £m	Currency movement £m	At 31 March 1998 £m

15. Fixed asset investments (continued)*(a) Subsidiary and associated undertakings*

Details of the principal operating subsidiary and associated undertakings are set out on pages 78 and 79.

(b) MCI Communications Corporation

In September 1994, the company completed the acquisition of a 20% equity interest in MCI (the second largest carrier of long-distance telecommunications services in the USA) represented by a holding of 136 million Class A common shares, whereupon MCI became the group's most significant associated undertaking. On 3 November 1996, the company entered into a merger agreement with MCI whereby the group would acquire the entire share capital of MCI, not already owned. On 21 August 1997, the terms of the merger agreement were modified. On 1 October 1997, WorldCom announced its intention to offer shares in its company to MCI shareholders as an alternative to the proposed merger and, following an improved offer from WorldCom on 9 November 1997, the company agreed that it would support the proposed merger with WorldCom to which the MCI board had agreed on the same day. On 11 March 1998, both MCI's and WorldCom's shareholders approved their merger.

The company has agreed with WorldCom and MCI to sell the group's holding of 136 million unlisted Class A common shares in MCI to WorldCom for US\$51 per share in cash at the time the MCI/WorldCom merger is completed. The potential consideration of US\$6,936m was equivalent to £4,137m at the exchange rate ruling on 31 March 1998. The completion of the merger is subject to regulatory clearance. The group also holds 0.7 million listed common shares in MCI, most of which were purchased in November 1995. These shares will be exchanged for WorldCom common shares on completion of the merger. If fully listed, the market value of the MCI shares held by the group at 31 March 1998 would have been £4,048m.

As a consequence of the termination of the company's merger agreement with MCI and the company's agreement with WorldCom and MCI, the group ceased treating MCI as an associate from 1 November 1997. The group's share of its associates' results includes a loss before tax of £27m for its share of MCI's results up to that date (1997 – £175m profit, 1996 – £101m profit).

At 31 March 1998, the group's investment in MCI is stated at £813m (1997 – £834m). Goodwill amounting to £2,214m has been written off to group reserves in prior years in respect of this investment and this goodwill will be accounted for at the completion of the MCI/WorldCom merger in determining the profit on the sale of the shares which the group will recognise.

In the period 1 April 1997 to 31 October 1997, the group's turnover with MCI amounted to £108m (1997 – £134m, 1996 – £92m) and the group purchased £56m in the same period (1997 – £87m, 1996 – £77m) in services and products from MCI.

(c) Cegetel

On 24 September 1997, the group completed its acquisition of a 26% interest in Cegetel, a leading French telecommunications company. Of the cost of the investment in the associated undertaking of £1,029m, goodwill arising of £862m has been written off against reserves.

The acquisition of the interest in Cegetel comprised:

	£m
Group share of original book value of net assets	483
Fair value adjustment to achieve consistency of accounting policies	(316)
Fair value to the group	167
Goodwill	862
Total cost	1,029

(d) Other investments

Other investments include ordinary shares of the company, with a net book value of £29m (1997 – £20m) and a market value of £68m (1997 – £28m), held in trust for the Long Term Remuneration Plan and the Performance Share Plan (note 28). Also, in the group balance sheet at 31 March 1998, listed investments were held with a book value of £117m (1997 – £72m) and a market value of £154m (1997 – £61m).

(e) Subsidiary company acquisition

In February 1997, the group entered into an agreement to purchase from Banco Santander SA its 50% holding in the share capital of BT Telecomunicaciones SA, a joint venture between a wholly-owned subsidiary of the company and Banco Santander SA, for the equivalent of £76m. The transaction was completed in July 1997.

(f) Other related party transactions with associates

In the year ended 31 March 1998, the group's turnover with its other associated undertakings amounted to £74m (1997 – £23m) and the group purchased £9m (1997 – £30m) in services and products from these undertakings.

	Group		Company	
	1998 £m	1997 £m	1998 £m	1997 £m

Total loans and other borrowings	4,770	3,176	7,408	5,809

The group has an option to redeem the US dollar 9½% guaranteed debentures 2019 exercisable from February 1999 at a maximum premium of 105%.

18. Loans and other borrowings (continued)*(a) Average effective interest rates*

The average interest rates on page 61 take into account the effect of interest rate swaps. The interest basis of interest rate swap agreements used, the notional amounts, their average maturities and weighted average interest rates are shown below:

	Average maturity	Notional amount £m	Average interest receivable rate %	Average interest payable rate %
Pay fixed interest and receive variable interest	Over 5 years	1,124	6.2	8.5
Pay variable interest and receive fixed interest	Under 5 years	365	9.5	7.4

The rates of the variable rate portion of the swaps are based on quoted rates. In calculating the average variable rates, the latest rates agreed with the counterparty on each swap have been used. Changes in interest rates will affect the variable-rate information disclosed above.

(b) Unused committed lines of credit for short-term financing available at 31 March 1998 totalled approximately £786m, which was in support of a commercial paper programme or other borrowings. These lines of credit are normally available for up to one year.

19. Financial instruments and risk management

The group uses derivative financial instruments primarily to manage its exposure to market risks from changes in interest and foreign exchange rates. There has been no change in the risk profile between the year end and the date of these financial statements.

The notional amounts of derivatives summarised below do not necessarily represent amounts exchanged by the parties and, thus, are not a measure of the exposure of the group through its use of derivatives. The amounts exchanged are calculated on the notional amounts and other terms of the derivatives which relate to interest and exchange rates.

(a) Interest rate risk management

The group has entered into interest rate swap agreements with commercial banks and other institutions to vary the amounts and periods for which interest rates on borrowings are fixed. By swapping fixed rates on long-term borrowings into floating rates, the group has obtained lower floating-rate borrowings than those available if borrowing directly at a floating rate. Under interest rate swaps, the group agrees with other parties to exchange, at specified intervals, the difference between fixed rate and floating rate interest amounts calculated by reference to an agreed notional principal amount.

At 31 March 1998, the group had outstanding interest rate swap agreements having a total notional principal amount of £1,489m (1997 – £1,247m).

(b) Foreign exchange risk management

Cross currency swaps and forward foreign exchange contracts have been entered into to reduce the foreign currency exposure on the group's operations and the group's net assets. The group also enters into forward foreign exchange contracts to hedge investments, interest expense and purchase and sale commitments denominated in foreign currencies (principally US dollars). The terms of the currency swaps are up to 20 years and the terms of currency forward exchange contracts are typically less than one year. The purpose of the group's foreign currency hedging activities is to protect the group from the risk that the eventual net inflows and net outflows will be adversely affected by changes in exchange rates.

At 31 March 1998, the group had outstanding foreign currency swap agreements and forward exchange contracts having a total notional principal amount of £4,476m (1997 – £2,541m).

The fair values of foreign currency contracts at 31 March 1998 were £3,037m (1997 – £1,071m) for purchases of currency and £892m (1997 – £683m) for sales of currency. These fair values have been estimated by calculating their present values using the market discount rates, appropriate to the terms of the contracts, in effect at the balance sheet dates.

At 31 March 1998, the group had deferred unrealised gains of £nil (1997 – £21m) and losses of £36m (1997 – £7m), based on dealer-quoted prices, from hedging purchase and sale commitments. At 31 March 1998, the group also had deferred realised net losses of £12m (1997 – £36m net losses). These are included in the profit and loss account as part of the purchase or sale transaction when it is recognised, or as gains or losses when a hedged transaction is no longer expected to occur.

19. Financial instruments and risk management (continued)*(c) Concentrations of credit risk and credit exposures of financial instruments*

The group considers that it is not exposed to major concentrations of credit risk. The group, however, is exposed to credit-related losses in the event of non-performance by counterparties to financial instruments, but does not expect any counterparties to fail to meet their obligations. Based on interest and exchange rates in effect at 31 March 1998, the group had a maximum credit exposure of £118m (1997 – £113m) to one counterparty under foreign currency and interest rate swap agreements. The group limits the amount of credit exposure to any one counterparty. The group does not normally see the need to seek collateral or other security.

(d) Fair value of financial instruments

The following table shows the carrying amounts and fair values of the group's financial instruments at 31 March 1998 and 1997. The carrying amounts are included in the group balance sheet under the indicated headings, with the exception of derivative amounts related to borrowings, which are included in debtors or other creditors as appropriate. The fair values of the financial instruments are the amount at which the instruments could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

	Carrying amount		Fair value	
	1998 £m	1997 £m	1998 £m	1997 £m
Non-derivatives:				
Assets				
Cash at bank and in hand	62	26	62	26
Short-term investments (i)	731	2,974	731	2,974
Liabilities				
Short-term borrowings (ii)	550	221	550	221
Long-term borrowings, excluding finance leases (iii)	4,210	2,953	4,665	3,168
Derivatives relating to investments and borrowings (net) (iv):				
Assets	48	79	–	11
Liabilities	–	–	114	–

(i) The fair values of listed short-term investments were estimated based on quoted market prices for those investments. The carrying amount of the other short-term deposits and investments approximated to their fair values due to the short maturity of the instruments held.

(ii) The fair value of short-term borrowings approximated to carrying value due to the short maturity of the instruments.

(iii) The fair value of the group's bonds, debentures, notes and other long-term borrowings has been estimated on the basis of quoted market prices for the same or similar issues with the same maturities where they existed, and on calculations of the present value of future cash flows using the appropriate discount rates in effect at the balance sheet dates, where market prices of similar issues did not exist.

(iv) The fair value of the group's outstanding foreign currency and interest rate swap agreements was estimated by calculating the present value, using appropriate discount rates in effect at the balance sheet dates, of affected future cash flows translated, where appropriate, into pounds sterling at the market rates in effect at the balance sheet dates.

Total potential liability for deferred taxation	1,954	1,562	1,749	1,367

22. Called up share capital

The authorised share capital of the company throughout the year ended 31 March 1998 was £2,625,000,001 divided into one special rights redeemable preference share of £1 and 10,500,000,000 ordinary shares of 25p each.

The allotted, called up and fully paid share capital of the company was £1,603m at 31 March 1998 (1997 – £1,589m), representing 6,411,214,670 ordinary shares (1997 – 6,355,115,816 ordinary shares and one special rights redeemable preference share).

Certain special rights, set out in the company's articles of association, were attached to the special rights redeemable preference share issued to HM Government. The share, which carried no right to capital or profits beyond its nominal value, was redeemed at par by HM Government on 10 September 1997.

Of the authorised but unissued share capital at 31 March 1998, 261 million ordinary shares were reserved to meet options granted under the employee share option schemes described in note 28.

Ordinary shares allotted during the year were as follows:

	Number	Nominal value £	Consideration(a) £
Savings related schemes	45,762,406	11,440,602	122,602,122
Other share option schemes	6,554,498	1,638,625	21,454,362
Scrip dividend	3,781,950	945,487	-
Totals for the year ended 31 March 1998	56,098,854	14,024,714	144,056,484

(a) Consideration excludes contributions from group undertakings as described in note 23(d).

During the year ended 31 March 1998 a number of shareholders elected to take all or part of their interim dividend in shares at a value of £18m. The nominal value of the shares issued has been funded out of the capital redemption reserve and the amount of the dividend has been added back to the profit and loss reserve.

(a) The share premium account, representing the premium on allotment of shares and the capital redemption reserve are not available for distribution.

(b) Aggregate goodwill at 31 March 1998 in respect of acquisitions in the current and earlier years of £3,603m (1997 – £2,671m, 1996 – £2,477m) has been written off against retained earnings. The goodwill written off in the year ended 31 March 1998 mainly arose in connection with the acquisition of the interest in Cegetel; that written off in the year ended 31 March 1997 mainly arose in connection with the acquisition of shares not already owned in BT Telecomunicaciones SA and the acquisition of Syntegra Groep BV; that written off in the year ended 31 March 1996 mainly arose in connection with an acquisition made by MCI.

(c) The cumulative foreign currency translation adjustment, which decreased retained earnings at 31 March 1998, was £130 million (1997 – £56m decrease, 1996 – £20m increase).

(d) During the year ended 31 March 1998 the company issued shares at a market value of £203m in respect of the exercise of options awarded under its principal savings-related share option scheme. Employees paid £118m to the group for the issue of these shares and the balance of £85m comprised contributions to the qualifying employee share ownership trust from group undertakings.

(e) The profit for the financial year, dealt with in the profit and loss account of the company and after taking into account dividends from subsidiary undertakings, was £2,150m (1997 – £1,475m, 1996 – £2,339m). As permitted by Section 230 of the Companies Act 1985, no profit and loss account of the company is presented.

	Group		Company	
	1998 £m	1997 £m	1998 £m	1997 £m
24. Financial commitments and contingent liabilities				
Contracts placed for capital expenditure not provided for in the accounts	1,047	1,125	965	1,008
Operating lease payments payable within one year of the balance sheet date were in respect of leases expiring:				
Within one year	9	10	3	6
Between one and five years	39	32	21	19
After five years	135	131	94	92
Total payable within one year	183	173	118	117

Future minimum operating lease payments for the group at 31 March 1998 were as follows:

Payable in the year ending 31 March:

	1998 £m
1999	183
2000	167
2001	127
2002	122
2003	118
Thereafter	1,265
Total future minimum operating lease payments	1,982

Operating lease commitments were mainly in respect of leases of land and buildings.

At 31 March 1998, there were no contingent liabilities or guarantees other than those arising in the ordinary course of the group's business and on these no material losses are anticipated. The group has insurance cover to certain limits for major risks on property and major claims in connection with legal liabilities arising in the course of its operations. Otherwise, the group generally carries its own risks.

The company has guaranteed certain borrowings of subsidiary undertakings amounting to £1,330m (1997 – £1,577m).

Satellite consortia, in which the company has participating interests, are organisations without limited liability. At 31 March 1998, the company's share of the aggregate borrowings of these consortia amounted to £188m (1997 – £179m).

Outstanding at 31 March 1998 and 1997 were warrants entitling the holders to subscribe in 1999 for US dollar 8.765% guaranteed bonds at par, repayable in 2009, to be issued by the group with a total principal value equivalent to £119m (1997 – £123m).

The company does not believe there are any pending legal proceedings which would have a material adverse effect on the financial position or results of operations of the group.

As explained in note 15(b), the company's merger agreement with MCI (the BT/MCI merger) was terminated on 9 November 1997. Individuals purporting to represent classes of MCI shareholders have now filed seventeen complaints in the Court of Chancery in the State of Delaware (the "Delaware Shareholder Class Actions"), asserting claims in connection with the original and renegotiated terms of the then-proposed BT/MCI merger. MCI and certain of its officers and directors, including officers of the company who served as MCI directors, are named as defendants in all seventeen Delaware Shareholder Class Actions. The company is named as a defendant in fifteen of these cases. The original and amended complaints filed in these fifteen cases collectively allege that the company breached and aided and abetted breaches of fiduciary duties owed to MCI shareholders in connection with the then-proposed BT/MCI merger. In addition, amended complaints in five of the Delaware Shareholder Class Actions assert claims in connection with the pending WorldCom/MCI merger, including challenges to the merger termination fee paid to the company and the company's right to receive cash in exchange for its Class A common shares in MCI. Four of these amended complaints name the company as a defendant. The court, having issued an order consolidating fifteen of the Delaware

24. Financial commitments and contingent liabilities (continued)

Shareholder Class Actions, subsequently directed the plaintiffs to submit a proposed order vacating that consolidation order and to submit a new proposed order of consolidation. The parties have agreed that the defendants are not obligated to respond to the complaints filed in these fifteen cases until the consolidation issue has been resolved and the plaintiffs serve the defendants with a consolidated and amended complaint. In the two Delaware Shareholder Class Actions that were not included in the court's initial consolidation order, neither the company nor its officers who served as MCI directors have been served, and have therefore not responded to the complaints.

In addition, after the renegotiation of the terms of the BT/MCI merger, an MCI shareholder filed a derivative action on behalf of MCI in the Court of Chancery in the State of Delaware. The complaint names the company and certain officers and directors of MCI, including officers of the company who served as MCI directors, as defendants. Among the claims asserted in the complaint is the allegation that the company aided and abetted breaches of fiduciary duty in connection with the proposed BT/MCI merger. The complaint does not take into account the subsequent WorldCom/MCI merger agreement. The parties have agreed that defendants need not respond to the complaint until the plaintiffs serve an amended complaint. No such complaint has yet been served.

In addition, individuals purporting to represent a class of persons who purchased MCI shares during the period 11 July 1997 to 21 August 1997 have filed a consolidated amended class action complaint (the "Complaint") under the caption In Re MCI Communications Corp Securities Litigation, now pending in the federal district court for the District of the District of Columbia. The Complaint supersedes certain earlier federal securities class action complaints. The Complaint alleges that MCI, the company and certain MCI officers and directors, including officers of the company who served as MCI directors, violated the federal securities laws by failing timely to disclose that MCI was renegotiating the terms of the merger with the company.

The company believes that it will prevail in the foregoing actions.

25. Pension costs

The total pension cost of the group expensed within staff costs was £177m (1997 – £291m, 1996 – £284m), of which £169m (1997 – £281m, 1996 – £275m) related to the group's main pension scheme, the BT Pension Scheme (BTPS). The reduction in the cost in the year ended 31 March 1998 was mainly attributable to the greater than assumed return on the BTPS assets in the three year period to 31 December 1996, i.e. between the last two actuarial valuations. The increase in the charge in the year ended 31 March 1997 was mainly attributable to the increase in interest on the pension provisions in the balance sheet which had risen by £311m to £1,291m in the year ended 31 March 1997.

The pension cost for the year ended 31 March 1998 was based on the valuation of the BTPS at 31 December 1996. The pension cost for the years ended 31 March 1996 and 1997 were based on the valuation of the BTPS at 31 December 1993. The valuations, carried out by professionally qualified independent actuaries, used the projected unit method. The valuations were determined using the following long-term assumptions:

	Rates (per annum)	
	1996 %	1993 %
Return on existing assets, relative to market values	8.0	8.6
Return on future investments	8.4	9.7
Real equity dividend growth	0.75	0.5
Average increase in retail price index	4.0	5.0
Average future increases in wages and salaries	5.8	6.8

At 31 December 1996, the assets of the BTPS had a market value of £19,879m and were sufficient to cover 100.3% of the benefits that had accrued to members by that date, after allowing for expected future increases in wages and salaries but not taking into account the costs of providing incremental pension benefits for employees taking early retirement under release schemes since that date. This cost, which amounted to £224m in the year ended 31 March 1998, will be taken into account at the next planned actuarial valuation at 31 December 1999. The incremental pension costs of employees taking early retirement in the years ended 31 March 1997 and 1996, £258m and £266m, respectively were included in redundancy costs charged to the profit and loss account in those years.

In the year ended 31 March 1998, the group made regular contributions of £238m (1997 – £232m, 1996 – £234m).

25. Pension costs (continued)

Certain activities of the BTPS are carried out at the company's pension centre, all costs of which are borne by the company. These costs have not been apportioned for accounting purposes between those attributable to the BTPS and those attributable to the company because functions maintained for both entities cannot be meaningfully divided between them. The company occupies eight properties owned by the scheme on which an annual rental of £3m is payable.

The BTPS assets are invested in UK and overseas equities, UK and overseas properties, fixed interest and index linked securities, deposits and short-term investments. At 31 March 1998, the UK equities included 42 million (1997 – 56 million) ordinary shares of the company with a market value of £270m (1997 – £250m).

26. Directors

Directors' emoluments

The emoluments of the directors for the year ended 31 March 1998 and the gains made by them on the exercise of share options were, in summary, as follows:

	1998 £000	1997 £000(a)	1996 £000(a)
Salaries	1,578	1,543	1,471
Performance-related bonus	882	636	543
Deferred bonus	222	–	–
Other benefits	114	94	71
	2,796	2,273	2,085
Payments to non-executive directors (b)	259	273	381
Total emoluments	3,055	2,546	2,466
Gain on the exercise of share options	857	93	6

(a) Comparative figures have been restated.

(b) Payments to non-executive directors include fees paid to their principal employer of £38,000 (1997 – £31,000, 1996 – £24,000).

More detailed information concerning directors' remuneration, shareholdings, options and long-term incentive plans is shown in the report on directors' remuneration on pages 33 to 40.

	1998		1997		1996	
	Year end '000	Average '000	Year end '000	Average '000	Year end '000	Average '000
27. People employed						
Number of employees in the group:						
UK	120.2	124.9	123.3	125.8	127.8	132.6
International	4.5	4.3	4.2	3.8	2.9	2.6
Total employees	124.7	129.2	127.5	129.6	130.7	135.2

28. Employee share schemes

The company has a share ownership scheme used for employee share allocations (profit sharing), savings-related share option schemes for its employees and those of participating subsidiaries and further share option schemes for selected group employees. It also has a performance share plan and a long-term remuneration plan.

Share option schemes

The major share option scheme, the BT Employee Sharesave Scheme, is savings related and the share options are normally exercisable on completion of a three or five-year Save As You Earn contract. A similar savings-related scheme exists for group employees overseas. Under the other share option schemes, share options are normally exercisable between the third and tenth anniversaries of the date of grant. Options outstanding under these share option schemes at 31 March, together with their exercise prices and dates, were as follows:

Normal dates of exercise	Option price per share	Number of ordinary shares		Normal dates of exercise	Option price per share	Number of ordinary shares	
		1998 millions	1997 millions			1998 millions	1997 millions
Savings-related schemes:				Other share option schemes:			
1997	265p	-	46	1992-1999	281p	-	1
1998	320p	45	47	1993-2000	289p	1	3
1999	341p	27	29	1995-2002	333p	3	4
1999	300p	8	9	1996-2003	430p	2	2
2000	404p	5	-	1997-2004	375p	2	4
2000	306p	47	48				
2001	267p	68	70				
2002	359p	53	-				
				Total options outstanding		261	263

During the year ended 31 March 1998, BT granted 60 million options (1997 – 79 million, 1996 – nil) under the employee sharesave schemes. The weighted average fair value of share options granted during the year ended 31 March 1998 has been estimated on the date of grant using the Black-Scholes option pricing model. The following weighted average assumptions were used in that model: an expected life extending one month later than the first exercise date; estimated annualised dividend growth rates of approximately 5%; risk free interest rates of 7% on options exercisable three years after the date of grant and 8% on options exercisable five years after the date of grant; and expected volatility of approximately 18%.

The weighted average fair value of the share options granted in the year ended 31 March 1998 was 80p (1997 – 85p) for options exercisable three years after the date of grant and 120p (1997 – 107p) for options exercisable five years after the date of grant. The total value of share options granted by BT in the year ended 31 March 1998 was £70m (1997 – £83m). In accordance with UK accounting practices, no compensation expense is recognised for the fair value of options granted. See note 30 for the treatment under US GAAP.

28. Employee share schemes (continued)

Options granted, exercised and lapsed under these share option schemes during the years ended 31 March 1996, 1997 and 1998 and options exercisable at 31 March 1996, 1997 and 1998 were as follows:

	Savings related schemes millions	Other share option schemes millions	Total millions	Exercise price range	Weighted average exercise price
Outstanding, 31 March 1995	303	26	329	210p–460p	283p
Exercised	(50)	(7)	(57)	210p–380p	230p
Lapsed	(15)	–	(15)	210p–430p	305p
Outstanding, 31 March 1996	238	19	257	211p–460p	294p
Granted	79	–	79	267p–300p	271p
Exercised	(61)	(3)	(64)	211p–430p	251p
Lapsed	(7)	(2)	(9)	244p–430p	299p
Outstanding, 31 March 1997	249	14	263	243p–460p	297p
Granted	60	–	60	359p–596p	363p
Exercised	(46)	(6)	(52)	243p–430p	275p
Lapsed	(10)	–	(10)	243p–430p	313p

Exercisable, 31 March 1997	–	11	11	243p–460p	337p
Exercisable, 31 March 1998	–	7	7	262p–460p	362p

Long-term remuneration and performance share plans

A long-term remuneration plan (LTRP) and a performance share plan (PSP) were introduced for employees of the group in 1994 and 1995, respectively. Under the plans, company shares are acquired by an employee share ownership trust and are conditionally awarded to participants, although participants will only be entitled to these shares in full at the end of a five-year period under the LTRP and the end of a three-year period, which may be extended to four or five years, under the PSP if, at the end of the applicable period, the company has met the relevant pre-determined corporate performance measure and normally, if the participants are still employed by the group. Awards of shares were granted in each of the years from 1994 to 1997 under the LTRP and from 1995 to 1997 under the PSP. The corporate performance measure assesses the company's overall performance against those top 100 companies listed on the London Stock Exchange, as rated by the Financial Times (the FT-SE 100 index), at the beginning of the relevant performance period.

At 31 March 1998, 5.8 million shares in the company (1997 – 3.5 million) were held in trust for the PSP and 4.6 million shares (1997 – 2.7 million) were held in trust for the LTRP. Dividends earned on the shares during the conditional periods are reinvested in company shares for the potential benefit of the participants. Additional information relating to the plans is as follows:

	PSP		LTRP		Total	
	1998 £m	1997 £m	1998 £m	1997 £m	1998 £m	1997 £m
Value of range of possible future transfers: nil to	37.9	15.6	29.5	11.6	67.4	27.2
Provision for the costs of the plans charged to the profit and loss account in year	6.8	0.1	2.5	0.9	9.3	1.0
Nominal value of shares held in trust	1.5	0.9	1.1	0.7	2.6	1.6
Market value of shares held in trust	38.0	15.6	30.0	12.0	68.0	27.6

The values of possible future transfers of shares under the plans were based on the company's share price at 31 March 1998 of 650.0p (1997 – 445.5p). The provisions for the costs of the plans were based on best estimates of the company's performance over the plans' performance periods, relating to those portions of the plan performance periods from commencement up to the financial year end.

29. Auditors

The auditors' remuneration for the year ended 31 March 1998 for the group was £2,396,000 (1997 – £2,135,000, 1996 – £2,138,000), including £1,216,000 (1997 – £1,167,000, 1996 – £1,170,000) for the company.

The following fees were paid or are payable to the company's auditors, Coopers & Lybrand, in the UK for the year ended 31 March 1998:

	1998	1997	1996
	£000	£000	£000
Audit of the company's statutory accounts	1,216	1,167	1,170
Audits of the UK subsidiary undertakings' statutory accounts	510	396	349
Other services, including regulatory audits and tax compliance work	4,724	4,620	4,004
Total	6,450	6,183	5,523

In addition, fees of £1,295,000 (1997 – £1,888,000, 1996 – £1,395,000) were paid or are payable to other members of Coopers & Lybrand International for the year ended 31 March 1998 in respect of audit and other services to the company's overseas subsidiary undertakings and in respect of other services to the group.

30. United States Generally Accepted Accounting Principles

The group's consolidated financial statements are prepared in accordance with accounting principles generally accepted in the UK (UK GAAP), which differ in certain significant respects from those applicable in the US (US GAAP).

Differences between United Kingdom and United States generally accepted accounting principles

The following are the main differences between UK and US GAAP which are relevant to the group's financial statements.

(a) Pension costs

Under UK GAAP, pension costs are accounted for in accordance with UK Statement of Standard Accounting Practice No. 24, costs being charged against profits over employees' working lives. Under US GAAP, pension costs are determined in accordance with the requirements of US Statements of Financial Accounting Standards (SFAS) Nos. 87 and 88. Differences between the UK and US GAAP figures arise from the requirement to use different actuarial methods and assumptions and a different method of amortising surpluses or deficits.

(b) Accounting for redundancies

Under UK GAAP, the group generally charges to profit and loss direct severance costs, primarily severance payments and payments in lieu of notice, in the period in which employees leave the group. The cost of providing incremental pension benefits in respect of workforce reductions are taken into account in determining current and future pension costs, unless the most recent actuarial valuation under UK actuarial conventions shows a deficit. In this case, the costs of providing incremental pension benefits are included in redundancy charges in the year in which the employees leave the group.

Under US GAAP, if employees are encouraged to leave voluntarily by the use of special termination benefits, then the termination benefits, primarily severance payments, payments in lieu of notice and the associated cost of providing incremental pension benefits, are charged against profits in the period in which the termination terms are agreed with the employees. If staff terminations are likely to be enforced, then the termination benefits are charged against profits at the time when the group is committed to the staff terminations and the associated costs can be reasonably estimated.

(c) Capitalisation of interest

Under UK GAAP, the group does not capitalise interest in its financial statements. To comply with US GAAP, the estimated amount of interest incurred whilst constructing major capital projects is included in fixed assets, and depreciated over the lives of the related assets. The amount of interest capitalised is determined by reference to the average interest rates on outstanding borrowings. At 31 March 1998 under US GAAP, gross capitalised interest of £525m (1997 – £722m) with regard to the company and its subsidiary companies was subject to depreciation generally over periods of 3 to 25 years.

(d) Goodwill

Under UK GAAP, the group writes off goodwill arising from the purchase of subsidiary and associated undertakings on acquisition against retained earnings. The goodwill is reflected in the net income of the period of disposal, as part of the calculation of the gain or loss on divestment, or when recognising a permanent diminution in value. Under US GAAP, such goodwill is held as an intangible asset in the balance sheet and amortised over its useful life and only the unamortised portion is included in the gain

30. United States Generally Accepted Accounting Principles (continued)**(d) Goodwill** (continued)

or loss recognised at the time of divestment. Gross goodwill under US GAAP at 31 March 1998 of £925m (1997 – £1,986m) was subject to amortisation over periods of 3 to 40 years. Goodwill relating to MCI has been unchanged since 31 October 1997 when the investment ceased to have associated company status. The value of goodwill is reviewed annually and the net asset value is written down if a permanent diminution in value has occurred.

(e) Mobile cellular telephone licences, software and other intangible assets

Certain intangible fixed assets recognised under US GAAP purchase accounting requirements are subsumed within goodwill under UK GAAP. Under US GAAP these separately identified intangible assets are valued and amortised over their useful lives.

(f) Investments

Under UK GAAP, investments are held on the balance sheet at historical cost. Under US GAAP, trading securities and available-for-sale securities are carried at market value with appropriate valuation adjustments recorded in profit and loss and shareholder's equity, respectively. The net unrealised holding gain on available-for-sale securities for the year ended 31 March 1998 which related primarily to the investment in MCI was £1,315m (1997 – £nil, 1996 – £nil).

(g) Deferred taxation

Under UK GAAP, provision for deferred taxation is generally only made for timing differences which are expected to reverse. Under US GAAP, deferred taxation is provided on a full liability basis on all temporary differences, as defined in SFAS No. 109.

At 31 March 1998, the adjustment of £2,095m (1997 – £1,942m) reconciling ordinary shareholders' equity under UK GAAP to the approximate amount under US GAAP included the tax effect of other USGAAP adjustments. This comprised an adjustment decreasing non-current assets by £76m (1997 – £138m decrease); an adjustment increasing current assets by £68m (1997 – £408m decrease); an adjustment decreasing current liabilities by £184m (1997 – £191m decrease); an adjustment decreasing minority interests by £3m (1997 – £nil) and an adjustment increasing non-current deferred tax liabilities by £2,274m (1997 – £1,587m increase).

(h) Dividends

Under UK GAAP, dividends are recorded in the year in respect of which they are declared (in the case of interim or any special dividends) or proposed by the board of directors to the shareholders (in the case of final dividends). Under US GAAP, dividends are recorded in the period in which dividends are declared.

Net income and shareholders' equity reconciliation statements

The following statements summarise the material estimated adjustments, gross of their tax effect, which reconcile net income and shareholders' equity from that reported under UK GAAP to that which would have been reported had US GAAP been applied.

Net income

YEAR ENDED 31 MARCH	1998 £m	1997 £m	1996 £m
Net income applicable to shareholders under UK GAAP	1,706	2,077	1,986
Adjustments for:			
Pension costs	(66)	83	18
Redundancy charges	(253)	156	(152)
Capitalisation of interest, net of related depreciation	(38)	(23)	(22)
Goodwill amortisation	(71)	(73)	(74)
Mobile licences, software and other intangible asset capitalisation and amortisation, net	42	77	38
Investments	5	–	(2)
Deferred taxation	163	(148)	14
Other items	(37)	–	–
Net income as adjusted for US GAAP	1,451	2,149	1,806
Basic earnings per American Depositary Share as adjusted for US GAAP (a)	£2.27	£3.39	£2.88
Diluted earnings per American Depositary Share as adjusted for US GAAP (a)	£2.24	£3.36	£2.84

30. United States Generally Accepted Accounting Principles (continued)**Shareholders' equity**

AT 31 MARCH

	1998 £m	1997 £m
Shareholders' equity under UK GAAP	10,785	11,116
Adjustments for:		
Pension costs	(1,347)	(1,057)
Redundancy costs	(41)	(12)
Capitalisation of interest, net of related depreciation	299	337
Goodwill, net of accumulated amortisation	2,118	2,146
Mobile licences, software and other intangible asset capitalisation and amortisation	930	260
Investments	1,266	(24)
Deferred taxation	(2,095)	(1,942)
Dividend declared after the financial year end	737	764
Other items	(37)	–
Shareholders' equity as adjusted for US GAAP	12,615	11,588

(a) Each American Depositary Share is equivalent to 10 ordinary shares of 25p each.

Minority Interests

Under USGAAP, the minority interest charge would have been reduced by £5m (1997 – £nil, 1996 – £nil) after adjusting for goodwill amortisation. Net assets attributable to minority interests would have been £81m higher (1997 – £nil) after adjusting for goodwill, investments and other items.

Accounting for share options

Under UKGAAP, the company does not recognise compensation expense for the fair value, at the date of grant, of share options granted under the employee share option schemes. Under US GAAP, the company adopted the disclosure-only option in SFAS No. 123 "Accounting for Stock-Based Compensation" in the year ended 31 March 1997. Accordingly, the company accounts for share options in accordance with APB Opinion No. 25 "Accounting for Stock Issued to Employees", under which no compensation expense is recognised. Had the group expensed compensation cost for options granted in accordance with SFAS No. 123, the group's pro forma net income, basic earnings per share and diluted earnings per share under US GAAP would have been £1,436m (1997 – £2,126m, 1996 – £1,800m), 22.5p (1997 – 33.6p, 1996 – 28.7p) and 22.1p (1997 – 33.2p, 1996 – 28.4p), respectively. The SFAS No. 123 method of accounting does not apply to share options granted before 1 January 1995, and accordingly, the resulting pro forma compensation costs may not be representative of that to be expected in future years. See note 28 for the SFAS No. 123 disclosures of the fair value of options granted under employee sharesave schemes at date of grant.

Consolidated statements of cash flows

Under UK GAAP, the Consolidated Statements of Cash Flows are presented in accordance with UK Financial Reporting Standard No. 1 (FRS 1). The statements prepared under FRS 1 present substantially the same information as that required under SFAS No. 95.

Under SFAS No. 95 cash and cash equivalents include cash and short-term investments with original maturities of three months or less. Under FRS 1 cash comprises cash in hand and at bank and overnight deposits, net of bank overdrafts.

Under FRS 1, cash flows are presented for operating activities; returns on investments and servicing of finance; taxation; capital expenditure and financial investments; acquisitions and disposals; dividends paid to the company's shareholders; management of liquid resources and financing. SFAS No. 95 requires a classification of cash flows as resulting from operating, investing and financing activities.

30. United States Generally Accepted Accounting Principles (continued)

Cash flows under FRS 1 in respect of interest received, interest paid (net of that capitalised under US GAAP) and taxation would be included within operating activities under SFAS No. 95. Cash flows from purchases, sales and maturities of trading securities, while not separately identified under UK GAAP, would be included within operating activities under US GAAP. Capitalised interest, while not recognised under UK GAAP, would be included in investing activities under US GAAP. Dividends paid would be included within financing activities under US GAAP.

The following statements summarise the statements of cash flows as if they had been presented in accordance with US GAAP, and include the adjustments which reconcile cash and cash equivalents under US GAAP to cash at bank and in hand reported under UK GAAP.

	1998 £m	1997 £m	1996 £m
Net cash provided by operating activities	3,847	5,066	5,026
Net cash used in investing activities	(4,198)	(2,589)	(3,257)
Net cash used in financing activities	(1,647)	(1,517)	(975)
Net increase (decrease) in cash and cash equivalents	(1,998)	960	794
Effect of exchange rate changes on cash	21	(14)	4
Cash and cash equivalents under US GAAP at beginning of year	2,343	1,397	599
Cash and cash equivalents under US GAAP at end of year	366	2,343	1,397
Short-term investments with original maturities of less than 3 months	(304)	(2,317)	(1,276)
Cash at bank and in hand under UK GAAP at end of year	62	26	121

Current asset investments

Under US GAAP, investments in debt securities would be classified as either trading, available for sale or held-to-maturity. Trading investments would be stated at fair values and the unrealised gains and losses would be included in income. Securities classified as available-for-sale would be stated at fair values, with unrealised gains and losses, net of deferred taxes, reported in shareholders' equity. Debt securities classified as held-to-maturity would be stated at amortised cost. The following analyses do not include securities with original maturities of less than three months.

At 31 March 1998, the group held trading investments at a carrying amount of £384m (1997 – £173m) with fair values totalling £389m (1997 – £173m). Held-to-maturity securities at 31 March 1997 and 1998 consisted of the following:

	Amortised cost £m	Estimated fair value £m
UK Government securities and other UK listed investments	25	25
Commercial paper, medium term notes and other investments	18	18
Total at 31 March 1998	43	43
UK Government securities and other UK listed investments	44	44
Commercial paper, medium term notes and other investments	439	439
Total at 31 March 1997	483	483
The contractual maturities of the held-to-maturity debt securities at 31 March 1998 were as follows:	Cost £m	Fair value £m
Maturing on or before 31 March 1999	18	18
Maturing after 31 March 1999	25	25
Total at 31 March 1998	43	43

30. United States Generally Accepted Accounting Principles (continued)**Pension costs**

The following position for the main pension scheme is computed in accordance with US GAAP pension accounting rules under SFAS No. 87 and SFAS No. 88, the effect of which is shown in the above reconciliation statements.

The pension cost determined under SFAS No. 87 requirements for the year ended 31 March 1998 was calculated by reference to an expected long-term rate of return on scheme assets of 8.2% (1997 – 9.2%, 1996 – 9.6%). The components of the pension cost for the main pension scheme comprised:

	1998 £m	1997 £m	1996 £m
Cost of benefits earned during the year	327	268	266
Interest cost on projected benefit obligation	1,554	1,645	1,543
Actual return on scheme assets	(3,494)	(2,038)	(2,799)
Net amortisation and deferral	1,846	323	1,244
Additional cost of termination benefits	224	258	266
Pension cost for the year under US GAAP	457	456	520

The projected benefit obligation for the main pension scheme was determined using the following assumptions at 1 January 1997 and 1 January 1998:

	1998 per annum %	1997 per annum %
Discount rate	7.2	7.7
Rate of future pay increases	5.8	5.8

The determination also took into account requirements in the scheme as to future pension increases.

The information required to be disclosed in accordance with SFAS No. 87 concerning the funded status of the main scheme at 31 March 1997 and 31 March 1998, based on the valuations at 1 January 1997 and 1 January 1998, respectively, is given below.

	1998 £m	1997 £m
Actuarial present value of accumulated benefit obligation due to past and present employees (all benefits vested)	21,299	18,823
Projected benefit obligation	23,513	20,733
Scheme assets at fair value	22,666	19,879
Projected benefit obligation in excess of scheme assets	(847)	(854)
Unrecognised net obligation at date of initial application of SFAS No. 87 (a)	262	314
Unrecognised prior service costs (b)	223	247
Other unrecognised net gains	(2,199)	(2,062)
Accrued pension cost under US GAAP	(2,561)	(2,355)

(a) The unrecognised net obligation at the date of initial application is being amortised over 15 years from 1 April 1988.

(b) Unrecognised prior service costs on scheme benefit improvements, are being amortised over periods of 15 or 16 years commencing in the years of the introduction of the improvements.

Subsidiary and associated undertakings

Brief details of principal operating subsidiary and associated undertakings at 31 March 1998, all of which were unlisted unless otherwise stated, were as follows:

Subsidiary undertakings	Activity	Group interest in allotted capital (b)	Country of operations (c)
BT Australasia Pty Limited (a)	Communication related services and products provider	100% ordinary 100% preference	Australia
BT (CBP) Limited (a)	Financial market telecommunication equipment provider	100% ordinary	International
BT Cableships Limited (a)	Cableship owner	100% ordinary	International
BT Communications Management Limited (a)	Telecommunication services provider	100% ordinary	International
BT France SNC (a)	Communication related services and products provider	100% equity	France
BT Limited (a)	Communication related services and products provider	100% ordinary	International
BT (Hong Kong) Limited (a)	Communication related services and products provider	100% ordinary 100% preference	Hong Kong
BT Network Information Services Company (a)	Communication related services and products provider	51% ordinary	Japan
BT North America Inc (a)	Communication related services and products provider	100% common	USA
BT Property Limited (a)	Property holding company	100% ordinary	United Kingdom
BT Subsea Cables Limited	Cable maintenance and repair	100% ordinary	United Kingdom
BT Telecomunicaciones SA (a)	Communication related services and products provider	100% ordinary	Spain
BT (Worldwide) Limited (a)	International telecommunication network systems provider	100% ordinary	International
Call Connections Limited (a)	Cellular telecommunication services provider	60% ordinary 60% preference	United Kingdom
Cellnet Group Limited (a)	Holding company for the Cellnet group	60% ordinary	United Kingdom
Cellnet Solutions Limited (a)	Messaging service provider for cellular telephone systems	60% ordinary	United Kingdom
Concert Communications Company (a)	Telecommunication services and network systems provider	75% ordinary	International
Europe Informatique SA (a)	Systems integration and application development	100% ordinary	France
First State Computing Unit Trust (a)	Systems integration and application development	100% equity	Australia
Manx Telecom Limited (a)	Telecommunication services supplier	100% ordinary	Isle of Man
Syntegra Groep BV (a)	Systems integration and application development	100% common	Netherlands

Subsidiary undertakings (continued)	Activity	Group interest in allotted capital (b)	Country of operations (c)
Telecom Securicor Cellular Radio Limited (a)	Mobile cellular telephone system provider and operator	60% ordinary	United Kingdom
Westminster Cable Company Limited	Cable television service provider	100% ordinary	United Kingdom
Yellow Pages Sales Limited (a)	Yellow Pages sales contractor	100% ordinary	United Kingdom

(a) Held through intermediate holding company.

(b) The proportion of voting rights held corresponds to the aggregate interest percentage held by the holding company and subsidiary undertakings, unless otherwise stated.

(c) All overseas undertakings are incorporated in their country of operations. Subsidiary undertakings operating internationally are all incorporated in England and Wales.

Associated undertakings	Activity	Share capital		Country of operations (b)
		Issued (a)	Percentage owned	
Albacom SpA	Communication related services and products provider	Lire 1,273 billion	23%	Italy
Bharti Cellular Limited	Mobile cellular telephone system provider and operator	Rs1.05 billion	23%	India
Cegetel SA	Communication related services and products provider	FFr 9.55 billion	26%	France
Clear Communications Limited	Communication related services and products provider	NZ\$101m	25%	New Zealand
Newtelco AG	Communication related services and products provider	SFr 19.7m	22%	Switzerland
Springboard Internet Services Limited	Internet service provider	£5.6m	33%	United Kingdom
Telenordia AB	Communication related services and products provider	SKR102m	33%	Sweden
Telfort BV	Communication related services and products provider	NLG 0.1m	50%	Netherlands
Viag Interkom GmbH & Co	Communication related services and products provider	Unincorporated	45%	Germany

(a) Issued share capital comprises ordinary or common shares, unless otherwise stated. All investments are held through intermediate holding companies.

(b) All overseas undertakings are incorporated in their country of operations.

Financial statistics

Financial ratios

YEAR ENDED 31 MARCH

	1994	1995	1996	1997	1998
Earnings per share – pence	28.5	27.8	31.6	32.8	26.7
Growth in net dividends per share % (a)	7.1	6.0	5.6	6.1	6.4
Return on capital employed % (b)	17.1	15.6	18.3	18.9	19.3
Gearing – net debt to equity % (c)	9.3	17.8	7.4	1.6	36.1
Interest cover (d)	13.0	10.3	18.2	25.2	14.7
Dividend cover (a) (e)	1.7	1.6	1.7	1.7	1.8

(a) 1997 and 1998 figures excluded the effects of the special dividend of 35p per share paid in September 1997.

(b) The ratio is based on profit before tax and interest on long-term borrowings, to average capital employed. Capital employed is represented by total assets less current liabilities, excluding corporate taxes and dividends payable, and provisions other than those for deferred taxation. Year-end figures are used in the computation of the average, except in the case of short-term investments and borrowings where average daily balances are used in their place.

(c) The ratio is based on borrowings net of cash and short-term investments to capital and reserves and minority interests.

(d) The number of times net interest payable is covered by operating profit. In 1995 and 1997, net interest excludes the premiums paid on the repurchase of bonds.

(e) The number of times dividends are covered by earnings. The figure for 1998 excludes the effect of the windfall tax charge.

Expenditure on research and development

Regulatory statistics and information

Price control

Under the company's licence, there are restrictions on the prices it may charge for its main switched telephone services. The company's performance against this price constraint, which is linked to the annual movement in the retail price index (RPI), is shown below.

YEAR COMMENCING 1 AUGUST	1993	1994	1995	1996	1997
% RPI movement for the relevant period (a)	1.22	2.62	3.52	2.14	2.94
RPI formula in effect (b)	(7.50)	(7.50)	(7.50)	(7.50)	(4.50)
% required reduction in prices (c)	(6.94)	(4.86)	(1.38)	(4.92)	(1.56)
% reduction in prices overall	(6.95)	(7.35)	(1.82)	(4.92)	(1.59)(d)

(a) Annual increase in RPI to previous June.

(b) From 1 August 1997, the RPI formula covers the main switched telephone services provided to the lowest 80% by bill size of BT's residential customers. The previous formula covered such services supplied to all residential and business customers.

(c) After permitted carry forward of any unused allowance or shortfall from previous years.

(d) Price changes implemented to 26 May 1998.

Exchange line disconnections for non-payment of bills

YEAR ENDED 31 MARCH 1998

	April	May	June	July	Aug	Sep
Business ('000)	21	18	18	19	15	18
Residential ('000)	96	73	71	84	86	71
Total disconnections ('000)	117	91	89	103	101	89
	Oct	Nov	Dec	Jan	Feb	Mar
Business ('000)	18	17	9	10	13	14
Residential ('000)	72	60	48	57	65	65
Total disconnections ('000)	90	77	57	67	78	79

BT's policy is not to disconnect customers for non-payment of regular bills unless 28 days have elapsed from the dispatch of the relevant bill, except in cases of suspected fraud. Generally, customers who are late in paying receive at least two reminders from BT, one of which is normally given by telephone, before the company considers disconnection. BT takes this action only as a last resort, after restricting the service to incoming calls only and giving customers an opportunity to agree revised payment plans.

Classified directory business in the UK

The company is providing the following information with respect to its classified directory business in the UK in accordance with undertakings made with the Office of Fair Trading in July 1996. For the year ended 31 March 1998, the classified directory business of BT made an operating profit of £179m (1997 – £166m) on turnover of £420m (1997 – £389m) and, at 31 March 1998, it employed net assets of £136m (1997 – £151m). Since the classified directory business is integrated with the company's wider operations, this financial information incorporates the effects of certain apportionments and allocations of expenditures and assets.

BT is required to submit annual audited accounts in respect of the classified directory business to the Director of the Office of Fair Trading within nine months of the company's financial year end. Copies of these accounts, when available, may be obtained free of charge from the *Financial Director, Yellow Pages at Queens Walk, Reading, RG1 7PT*.

Financial, operational and regulatory statistics have been restated where necessary to provide consistency with the presentation of the 1998 figures.

Additional information for shareholders

Analysis of shareholdings

Size of shareholding	Number of shareholders	Percentage of total	Ordinary shares of 25p each	
			Number of shares held (millions)	Percentage of total
AT 31 MARCH 1998				
1 – 399	912,968	44.7	198	3.1
400 – 799	596,978	29.3	322	5.0
800 – 1,599	358,289	17.6	392	6.1
1,600 – 9,999	166,091	8.1	439	6.9
10,000 – 99,999	3,645	0.2	91	1.4
100,000 – 999,999	1,405	0.1	502	7.8
1,000,000 – 4,999,999	429	0.0	934	14.6
5,000,000 and above (a)(b)(c)	172	0.0	3,533	55.1
Total	2,039,977	100.0	6,411	100.0(d)

(a) Under the BT Long Term Remuneration Plan and the BT Performance Share Plan 10 million shares were held in trust in respect of contingent awards of shares which have been granted to 870 participants in the two plans.

(b) Under the BT Employee Share Ownership Scheme 30 million shares were held in trust on behalf of 131,870 participants who were beneficially entitled to the shares.

(c) Approximately 110 million shares were represented by American Depositary Receipts and a further 12 million shares were held by a nominee of the Tokyo Stock Exchange on behalf of investors. Analysis by size of holding is not available for these holdings.

(d) 20.4% of the shares were in 1,996,319 individual holdings, of which 179,249 were joint holdings, and 79.6% of the shares were in 43,658 institutional holdings.

Listings

BT has a listing on the Stock Exchanges in London, New York and Tokyo.

BT shares are traded on the New York Stock Exchange in the form of American Depositary Shares (ADSs). Each ADS represents ten ordinary shares. Trading on the New York Stock Exchange is under the symbol “BTY”.

In Japan, BT shares are traded on the Tokyo Stock Exchange under the code “9484”.

CREST: London Stock Exchange settlement system

The company’s ordinary shares are settled in CREST, the computerised system for settling sales and purchases of shares. CREST is a voluntary system which enables shareholders, if they wish, to hold and transfer their shareholdings electronically rather than by paper. Shareholders who wish to retain their certificates are able to do so.

Personal equity plans (PEPs)

Details of BT single company PEPs and BT corporate PEPs offered by the Halifax may be obtained from: Halifax Investment Services Limited, Trinity Road, Halifax HX1 2RG, Tel. **Freefone 0800 371 769**. Other PEP managers offer similar products.

Results announcements

Expected announcements of results:

1st quarter	29 July 1998
2nd quarter and half year	12 November 1998
3rd quarter and nine months	February 1999
4th quarter and full year	May 1999
1999 annual report and accounts published	June 1999

Dividends

The proposed 1998 final dividend will be paid on 21 September to shareholders on the register on 7 August 1998.

The expected dividend payment dates in 1999 are:

1999 interim dividend payable	February 1999
1999 final dividend payable	September 1999

Dividend mandate

Any shareholder wishing dividends to be paid directly into a bank or building society account should contact the Registrar for a dividend mandate form. Dividends paid in this way will be paid through the Bankers Automated Clearing System (BACS).

Scrip dividends

In the year ended 31 March 1998, the group introduced the BT share dividend plan to allow shareholders to elect to receive additional shares in lieu of a cash dividend. The price per share of the scrip dividend paid on 16 February 1998 was 480.35p. This election for scrip dividends will also be available to ordinary shareholders in respect of the 1998 final dividend to be paid on 21 September 1998. The last date for lodging mandates for the BT share dividend plan in respect of the final dividend is 7 August 1998.

ADR Shareholder Services Programme

Details of the Morgan Guaranty Trust shareholder services programme, including reinvestment of dividends, are available from Morgan Guaranty Trust Co. of New York on 1 800 749 1687 (toll free in the USA) or +1 781 575 4328 (from outside USA), or on written request to the ADR Depository.

Form 20-F

The company will file its annual report on Form 20-F with the Securities and Exchange Commission in the USA by 30 September 1998.

Regulatory financial statements

The company will publish historical cost Financial Statements for the Businesses and Activities for the year ended 31 March 1998, as required by Oftel, by 31 July 1998. BT will also publish current cost Financial Statements for the Businesses and Activities for the year including long-run incremental cost information for the Network Business by 30 November 1998.

Copies of the Form 20-F, the Financial Statements for the Businesses and Activities, the Current Cost Financial Statements and details of quarterly results announcements, when available, may be obtained on request from the BT Shareholder Helpline provided by the company's Registrar, see page 86 for details.
